NOTE

From:	General Secretariat of the Council
To:	Delegations
No. Cion doc.:	COM(2025) 25 final
Subject:	ANNEX to the COUNCIL IMPLEMENTING DECISION amending Implementing Decision of 13 July 2021 on the approval of the assessment of the recovery and resilience plan for Latvia

Delegations will find attached the above-mentioned annex to the amending Council Implementing Decision.

ANNEX

SECTION 1: REFORMS AND INVESTMENTS UNDER THE RECOVERY AND RESILIENCE PLAN

1. Description of Reforms and Investments

A. COMPONENT 1: CLIMATE CHANGE AND ENVIRONMENTAL SUSTAINABILITY

The general objective of this component of the Latvian recovery and resilience plan is to contribute to the green transition and notably contribute to the environmental objectives of climate change mitigation and climate adaptation. Each sub-component focuses on some of the challenges of the green transition. Subcomponent 1.1 focuses on sustainable mobility with a view to decrease emissions in the transport sector, especially in Riga and its periphery by investing in clean public transport (notably railway) infrastructure. Subcomponent 1.2 mainly targets increasing energy efficiency by supporting various energy renovation programmes in public and private buildings and supporting sustainable energy networks. Lastly, subcomponent 1.3 contributes to climate adaptation by preventing climate change related risks such as fires and floods.

The component supports addressing the Country-Specific Recommendations on transport notably on its sustainability, energy efficiency and energy interconnections (Country Specific Recommendation 3, 2019). It also contributes to front-loading mature public investment projects and focusing on the green and digital transition, in particular clean and efficient production and use of energy, sustainable transport infrastructure (Country Specific Recommendation 3203, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

A.1. Description of the reforms and investments for non-repayable financial support

Reform: 1.1.1.r. Greening the Riga Metropolitan Transport System

The general objective of the measure is to contribute to reduce Latvia's greenhouse gas (GHG) emissions with a focus on transport which represents the biggest source of GHG emissions (28,5 % share of total GHG emissions (excluding land use, land-use change and forestry) in 2018 and 36,7 % of non-ETS GHG emissions). This measure specifically focuses on the Riga metropolitan area which covers about 65% of the Latvian population. A specific objective is to consolidate and rationalise the currently fragmented transport system to incentivise the use of public transportation.

The measure consists in a general overhaul of the Riga Metropolitan Transport System. A multimodal public transport network with a single and coherent timetable, a single price and discount policy and a single ticket system shall be created.

The measure shall be implemented by 31 December 2025.

Investment: 1.1.1.i. Improving Riga Metropolitan transport infrastructure

The general objective of this measure is to improve Riga metropolitan transport infrastructure. The measure shall include an investment programme in clean mobility and infrastructure with a focus on railway solutions (electrification of 100 km of railway, southern part of Riga Central Railway Station), zero-emission public transport (acquisition of 17 electric buses and seven electric bus charging stations) and construction of cycle lanes. This shall be complemented by the construction of a public transport hub (bus/electric bus, tram and trolleybus), eight mobility points, the extension of the tram line by 2.2 km and trolleybus line by 0.3 km, to support multimodal transport use.

The measure shall be implemented by 31 August 2026.

Investment: 1.2.1.1.i. Improving the energy efficiency of multi-apartment buildings and transition to renewable energy technologies

The general objective of this measure is to improve the energy efficiency of buildings. As energy consumed in the buildings sector accounts for up to 40% of the final energy consumption, the measure is expected to reduce the impact on the environment and contribute to climate change mitigation. Another aim is to reduce energy bills for inhabitants and increase the level of security of energy supply. Other specific objectives include reducing the level of energy poverty and supporting employment. This measure specifically focuses on multi-apartment buildings.

The measure consists of a support programme for energy renovation in multi-apartment buildings. It shall take the form of a financial instrument (loan) with a capital discount of up to 49% of the amount of the loan. Aid shall only be available for buildings where the project is expected to achieve at least 30% energy savings.

The measure shall be implemented from 1 September 2021 until 31 August 2026.

Investment: 1.2.1.2.i. Increasing energy efficiency in business, in the form of a combined financial instrument

The general objective of this measure is to improve the energy efficiency of Latvian businesses. Investments in the energy efficiency of businesses aim to promote a rationalised use of energy resources, reduce negative impacts on the environment and climate, as well as improve the productivity, competitiveness and export capacity of enterprises. This measure specifically focuses on businesses.

The first pillar of the measure consists in a support programme in the form of a combined financial instrument (loan with a grant in the form of a capital discount). The investment programme shall finance investments by enterprises in improving energy efficiency, introducing renewable energy technologies, as well as investing in sustainable transport and introducing new energy-efficient technologies in production. A second pillar of the measure shall consist in grants for the development (through industrial research, experimental development, feasibility studies) of new products and technologies related to the low carbon economy, climate resilience and adaptation.

The measure shall be implemented from 1 January 2022 until 31 August 2026.

In order to ensure that the measure complies with the 'Do no significant harm' Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects

shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use¹;

(ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks²; (iii) activities related to waste landfills, incinerators³ and mechanical biological treatment plants⁴; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

Investment: 1.2.1.3.i. Improving municipal buildings and infrastructure by promoting the transition to renewable energy technologies and improving energy efficiency

The general objective of this measure is to improve the energy efficiency of Latvian municipal buildings. A large part of existing municipal buildings had been built before thermal requirements for building were increased and therefore have a low energy performance. More specifically, the objective of the measure is to improve the energy efficiency of local government buildings and infrastructure in order to reduce annual primary energy consumption and reduce GHG emissions. As a complementary objective, this measure aims to reduce the cost of maintenance of municipal buildings.

The measure consists of investments in energy efficiency renovation in buildings owned by local government (and mixed properties where the municipalities are majority shareholders), including buildings dedicated to social housing, health care, education and social services.

The measure shall be implemented from 1 January 2022 until 31 December 2025.

Investment: 1.2.1.4.i. Improving the energy efficiency of public sector buildings, including historical buildings

The general objective of this measure is to improve the energy efficiency of the Latvian public building stock. It applies to buildings owned by the central government including historical ones. The measure seeks to improve their energy efficiency, promote the transition to renewable energy in energy production, and achieve GHG emission reductions.

¹ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

² Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

³ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁴ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

The measure consists of investment in energy efficiency improvements for public buildings. The aid shall ensure that the implementation of all projects shall, on average, result in at least 30% energy savings under the programme.

The measure shall be implemented from 1 January 2022 until 31 August 2026.

Investment: 1.2.1.5.i. Modernisation of electricity transmission and distribution networks

The general objective of this measure is to contribute to reaching climate neutrality objectives by creating a sustainable grid infrastructure in which green technologies notably wind may be more easily deployed. Investments in the green transformation of electricity grids and digital infrastructure are necessary to provide adequate electricity supply infrastructure for electro-mobility, and sustainable and efficient system operation. The measure aims to contribute to the synchronisation of the Baltic electricity systems with continental European networks and the objectives and activities of the Baltic Electricity Market Integration Plan.

The measure consists of direct investment in upgrading the electricity grid, developing IT solutions to increase the flexibility and security of the transmission system and distribution system and creating among others a national electricity market data exchange and storage platform and an automated smart metering system. The measure shall also improve the regulatory framework and the enabling conditions to facilitate the deployment of onshore wind energy on state forest land and to reduce legal uncertainty for investments in wind power. The measure shall be implemented from 1 January 2022 until 31 August 2026.

Reform: 1.3.1.r. Disaster management system adaptation to climate change, rescue and rapid response services

The general objective of this measure is to contribute to climate objectives by strengthening the response capacity of disaster and fire rescue services. The measure shall contribute to climate adaptation by shortening the response time of fire rescue services (in the framework of a more general reform integrating different services of the Ministry of the Interior under one roof). The measure aims to contribute to climate mitigation by moving these services to new energy efficient buildings.

The measure consists of the construction of eight new energy-efficient disaster management centres. The measure shall be implemented from 1 January 2022 until 31 March 2026.

1.3.1.2.i. Investments in flood risk reduction infrastructure

The general objective of this measure is to contribute to climate change adaptation by preventing floods. It shall lead to the implementation of investment projects protecting against the risk of flooding.

The measure consists of investments in flood risk reduction infrastructure, including rebuilding and renewal of polder pumping stations, renewal of protective dikes and a canal.

The measure shall be implemented from 1 January 2022 until 31 August 2026.

A.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Nr	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
1	1.1.1.r. Greening the Riga Metropolitan Range Transport System	Milestone	Coordinated approach for passenger transport planning, ordering and organisation of the Riga metropolitan area	A coordinated approach has been implemented for passenger transport planning, ordering and organisation of the Riga metropolitan area	N/A	N/A	N/A	Q4	2023	Completion of the necessary steps to implement coordinated approach. This includes among others: — setting up a working group for the coordination of Riga metropolitan area public transport planning; — The Riga metropolitan area public transport plan has been adopted in line with the development of passenger transport by rail in Latvia.
2	1.1.1.r. Greening the Riga Metropolitan Range Transport System	Milestone	Reform of public transport RMA	Entry into service of a unified multimodal public transport route network for the Riga metropolitan area	N/A	N/A	N/A	Q4	2025	Entry into service of a multimodal public transport route network for the Riga metropolitan area with a single and harmonised timetable, single price and discount policy and single ticket for integrated public transport system Riga metropolitan area
3	1.1.1.i. Improving Riga Metropolitan transport infrastructure	Target	Length of electric rail lines created and existing railway upgraded for passenger transport		Km	0	100	Q1	2026	Electrification (change of contact network for transition to 25 kV electrification system, increase of total length of electrified lines) and related activities (construction of electric track sections, adaptation of signaling systems).

Nr	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
4	1.1.1.i. Improving Riga Metropolitan transport infrastructure	Milestone	Signature of contracts for upgrading Riga Central Railway Station	Signed contracts	N/A	N/A	N/A	Q1	2025	Signature of contracts for construction works and for supervision of construction works in the southern part of Riga Central Railway Station. The construction works in the southern part of the Riga Central Railway Station include roof laying, the construction of the façade, platform canopy roof, finishing works, passenger access infrastructure, mechanical, electrical and plumbing works.
4a	1.1.1.i. Improving Riga Metropolitan transport infrastructure	Milestone	Upgraded Riga Central Railway Station	Completed construction works in Riga Central Station	N/A	N/A	N/A	Q3	2026	Completed construction works in the southern part of Riga Central Railway Station: roof, façade, platform canopy roof, finishing works, passenger access, mechanical, electrical and plumbing works.
5	1.1.1.i. Improving Riga Metropolitan transport infrastructure	Target	Zero-emission transport investments (electric buses and charging stations)		Number	0	24	Q3	2026	The following zero-emission transport investments shall be completed: - Delivery of 17 electric buses - Construction of 7 charging stations for buses
5a	1.1.1.i. Improving Riga Metropolitan	Milestone	Public transport infrastructure	Completed projects	N/A	N/A	N/A	Q3	2026	The following transport infrastructure shall be completed:

Nr	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
	transport infrastructure		projects completed							<ul style="list-style-type: none"> - One public transport hub (bus/electric bus, tram and trolleybus) - Eight mobility points - Extension of tram line by 2.2 km - Extension of trolleybus line by 0.3 km
6	1.1.1.i. Improving Riga Metropolitan transport infrastructure	Target	Length of newly built or renovated cycle infrastructure in the city of Riga and Pieriga (part of Riga Metropolitan Area)		Km	0	52	Q3	2026	Entry into operation of newly built or renovated cycle infrastructure.
7	1.2.1.1.i. Improving the energy efficiency of multi-apartment buildings and transition to renewable energy technologies	Milestone	Entry into force of support programme for improving energy efficiency in residential buildings	Entry into force of support programme for improving energy efficiency in residential buildings	N/A	N/A	N/A	Q1	2022	Entry into force of support programme for improving energy efficiency in residential buildings with eligibility criteria to reflect requirements of applicable intervention field “025 bis – energy efficiency renovation of existing housing, demonstration projects and support measures meeting energy efficiency criteria” of Annex VI of the RRF Regulation.
8	1.2.1.1.i. Improving the energy efficiency	Target	Approved projects representing at		EUR	0	40 097 400	Q3	2024	Approved projects by Altum representing at least EUR 40 097 400.

Nr	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
	of multi-apartment buildings and transition to renewable energy technologies		least EUR 40 097 400							Approval is undertaken by the development finance institution Altum.
9	1.2.1.1.i. Improving the energy efficiency of multi-apartment buildings and transition to renewable energy technologies	Target	Reduction of primary energy consumption in multi-apartment buildings with improved energy efficiency		MWh/Year	0	14 423	Q3	2026	Reduction of primary energy consumption in multi-apartment buildings benefitting from improved energy efficiency renovations under the measure.
10	1.2.1.2.i. Increasing energy efficiency in business in the form of a combined financial instrument	Milestone	Entry into force of the Support Programme for Entrepreneurial Energy Efficiency	Entry into force of Regulation	N/A	N/A	N/A	Q1	2022	<p>Entry into force of Regulation approved by the Cabinet of Ministers supporting the implementation of programmes to improve energy efficiency of businesses.</p> <p>The support programmes shall be implemented in the form of a combined financial instrument, which is a repayable loan and a capital discount.</p> <p>As eligibility criteria to reflect requirements of applicable intervention field “024.ter – Energy efficiency and demonstration projects in SMEs or large</p>

										<p>carried out have site-specific conservation objectives and that necessary conservation measures are in place in line with the Habitats Directive;</p> <p>iii) ensure full compliance with the Water Framework Directive (Directive/2000/60/EC) and not cause net-deterioration in the status of water bodies, in conformity with Article 4.7 of this Directive.</p>

B. COMPONENT 2: DIGITAL TRANSFORMATION

The component addresses the main digital challenges - a lack of basic and advanced digital skills and low digital integration of the businesses. Moreover, the component addresses all the aspects of the digital transformation - public and private sector, skills and connectivity. The main focus of the investments is in infrastructure and services.

The objectives of the component are to contribute to the digital transformation of the society and economy, including the recovery from the COVID-19 crisis, by developing the necessary infrastructure, capacities and skills; improve efficiency, digital processes, and data management in public administration; provide support to the digital transformation of businesses and improve connectivity.

The component addresses the Country Specific Recommendations on skills and adult learning (Country Specific Recommendation 2, 2019, Country Specific Recommendation 2, 2020). In particular, it shall contribute to increasing the quality and efficiency of education and training with a focus on digital skills. Reskilling and upskilling measures for workers and unemployed are included, albeit without targeting low-skilled (Country Specific Recommendation 2, 2019). Investments in digital transition address the investment related Country Specific Recommendations (Country Specific Recommendations 3, 2019 and 3, 2020) - investments are envisaged in public sector IT systems, basic and advanced digital skills, digital adaptation of businesses, and connectivity.

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

B.1. Description of the reforms and investments for non-repayable financial support

Reform: 2.1.1.r. Modernisation of national processes and services and digital transformation

The objective of the measure is to modernise public administration and its services through digital transformation, focusing on important functions, processes and services of the public administration that have not yet been digitally transformed, are being newly developed or substantially strengthened.

The reform consists of building the common ICT conceptual architecture for public administration services and their management support, defining qualitative and quantitative metrics of services. The implementation of the reform shall be coordinated and managed by the national ICT governance organisation, while the implementation of the specific tasks of implementing the reform shall be carried out by the authority responsible for each task.

The reform shall be implemented by 30 June 2022.

Investment: 2.1.1.1.i. Administration modernisation and digital transformation of services, including business environment

The objective of the measure is to transform public administration services and their delivery processes for the effective implementation of the digital transformation of the economy.

It shall be done through the use of innovative technologies and approaches, including artificial intelligence and machine learning solutions, as well as by introducing a data-based foresight and decision-making approach to service and process management and ensuring the full implementation of the ‘once-only’ principle.

The measure consists of investments in 11 individual systems or solutions in at least the following 4 areas: 1) the domestic affairs sector, including civil protection, fire safety supervision and public safety; 2) the cultural sector, including the accumulation of the heritage of archives, libraries, museums, cultural monuments and media content; 3) management of port logistics services; 4) support of ICT management processes.

The investment shall be implemented by 31 August 2026.

Reform: 2.1.2.r. Increasing efficiency and interoperability in the use of national ICT resources

The objectives of the reform are to transform the ICT provision approach in public administration by centralising the provision of uniform ICT sharing services in competence centres that support several institutions.

The reform consists of the development of central systems and platforms of public administration and consolidation of computing infrastructure services, enabling the automation and efficiency of the processes of supply, ensure cross-border access to public administration services, and consolidation of public administration computing and data storage infrastructure services.

The reform shall be implemented by 30 June 2022.

Investment: 2.1.2.1.i. Centralised platforms, systems and shared services

The objective of the investment is to ensure the functioning of the administration as a single organisation, which would include the introduction of standardised support functions such as accounting, staff administration, resource accounting and management.

The investment consists of four public service delivery platforms, five sectoral and support functions platforms, and six shared platforms and systems for municipalities.

The investment shall be implemented from 1 April 2022 until 31 August 2026.

Investment: 2.1.2.2.i. National Federated Cloud of Latvia

The objectives of the investment are to provide shared computing and data management infrastructure and services for the public administration and developing the ICT infrastructure competence centres for storage and computing of public administration data.

The investment consists of the development of public sector data storage and computational capabilities within the framework of four projects carried out by the Latvian State Radio and Television Centre, the National Library of Latvia, the Information Centre of the Ministry of the Interior and the Ministry of Agriculture. As a result of the investment, at least ten public administration platforms and information systems shall be operated through shared cloud computing services.

The investment shall be implemented by 31 August 2026.

Reform: 2.1.3.r. Development of the national economy data and digital services economy

The objective of the reform is to ensure the availability and sharing of public and private data and services by laying the foundations for the development and interoperability of the data and platform economy with European data spaces and by ensuring data sharing within the EU.

The reform consists of developing the capacities of the public sector to manage, share and publish for repeated use datasets at its disposal.

The reform shall be implemented by 31 December 2023.

Investment: 2.1.3.1.i. Data availability, sharing and analysis

The objectives of the investment are to promote data sharing within the public sector and between the public and private sectors, the introduction of the ‘once-only’ principle and the sharing of data in the national and European area.

The investment consists of creating high availability data loading and recovery solutions and a set of data objects from at least ten different sectors and areas of public administration, including the following eight sectors and areas: business, science, environment, finance, public procurement, healthcare, veterinary and agriculture (geospatial data).

The investment shall be implemented by 31 August 2026.

Reform: 2.2.1.r. Creating the full cycle of business digital transformation support with regional coverage

The objectives of the reform are to establish European Digital Innovation Hub (EDIH), ensure its regional presence through regional contact points, and to create a single and coordinated support ecosystem to facilitate the digital transformation of commercial activities.

The reform consists of establishing EDIH, a single platform/ecosystem supporting digital transformation as a one-stop-shop, establishing a digital maturity test system; ensuring the regional contact points provide the following new digital transformation support functions: digital maturity tests in regions; access to testing and piloting; mentoring and digital skills training. The EDIH may receive funding from other EU funds, including the Digital Europe programme, for carrying out their activities.

The reform shall be implemented by 30 September 2022.

Investment: 2.2.1.1.i. Support for the establishment of Digital Innovation Hubs and regional contact points

The objective of the investment is to enhance digital transformation of entities through offering tailored support measures based on identified digitalisation needs of entities.

The investment consists of providing support to the operation of European Digital Innovation Hubs (EDIH). The operation of the EDIHs shall be structured into work packages that aim to provide entities with a digital transformation roadmap; train entity representatives, and identify the investment and infrastructure needs. The RRF support shall not concern work packages for which EDIHs receive support under the Digital Europe Programme.

The investment shall be implemented by 30 June 2026.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream

use⁵; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks⁶; (iii) activities related to waste landfills, incinerators⁷ and mechanical biological treatment plants⁸; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation can be selected.

Investment: 2.2.1.2.i. Support for the digitisation of processes in commercial activities

The objectives of the investment are to promote increased productivity through targeted investment of resources, and to create higher added value in the entity processes.

The investment consists of a grant scheme for digitisation of the processes and functions in entities. Support may be granted for acquisition of IT solutions, both software and hardware, acquisition of sensors, purchase of IT equipment, IT infrastructure, implementing digital integration processes.

The investment shall be implemented by 30 June 2026.

Investment: 2.2.1.3.i. Support for the introduction of new products and services into business

The objective of the investment is to promote the creation of new high-tech digital products and services.

The investment consists of a grant scheme for the introduction of modern automation, robotisation and digitalisation in the manufacturing and service development processes, as well as to support the introduction of e-commerce solutions. Supported activities for new digital products and services include feasibility studies; industrial research, and experimental development, including prototyping.

The investment shall be implemented by 30 June 2026.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use⁹; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas

⁵ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

⁶ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

⁷ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁸ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁹ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

emissions that are not lower than the relevant benchmarks¹⁰; (iii) activities related to waste landfills, incinerators¹¹ and mechanical biological treatment plants¹²; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation can be selected.

Investment: 2.2.1.4.i. Financial instruments to facilitate the digital transformation of economic operators

The objectives of the investment are to boost the productivity and production process efficiency by supporting investments in digital transformation tools.

The investment consists of a support scheme (loan or parallel loan with possibility of a capital discount) for making changes to the production or service development process, to digitalise processes in economic operators or to introduce Industry 4.0 solutions (for example: internet of things, artificial intelligence, machine learning, block chain, big data, cloud computing high performance computing).

The investment shall be implemented by 30 June 2026.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use¹³; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks¹⁴; (iii) activities related to waste landfills, incinerators¹⁵ and mechanical biological treatment plants¹⁶; and (iv) activities where the

¹⁰ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

¹¹ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

¹² This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

¹³ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

¹⁴ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

¹⁵ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

¹⁶ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation can be selected.

Investment: 2.2.1.5.i. Fostering the digital transformation of media companies

The objectives of the investment are to facilitate the digital transformation of the media sector and to facilitate the adaptation of media companies to modern media consumption trends in the digital environment.

The investment consists of a support scheme for investments in the development of technological solutions and improving digital skills and business models in the media sector.

The investment shall be implemented by 30 June 2026.

Reform: 2.3.1.r. Development of a sustainable and socially responsible support framework for adult learning

The objectives of the reform are to increase the adult learning participation rate to 8% (adults aged 25-64) by 31 December 2025, facilitate reaching other targets set in the Education Development Guidelines 2021-2027, strengthen the legal framework for a sustainable and socially responsible support system for adult learning and create more opportunities and rights for employees including via enterprises (especially SMEs) to participate in education and training.

The reform consists of a set of policy development milestones from the Education Development Guidelines 2021-2027 coming into force; enhancing support for training of employees; setting up and piloting individual learning accounts; and piloting three skills funds.

The reform shall be implemented by 30 June 2026.

Investment: 2.3.1.1.i. Ensuring the acquisition of advanced digital skills

The objective of the investment is to significantly increase the number of specialists with high-level digital skills (DESI levels 3-5) that are able to apply high technology knowledge and technology-intensive new products and services to the development of new products and services in different sectors in the next six years.

The investment consists of developing approximately 20 advanced digital skills training modules in quantum technologies, HPC and language technologies to be included in formal and adult education and training programmes.

The investment shall be implemented by 31 August 2026.

Investment: 2.3.1.2.i. Development of digital skills of enterprises

The objective of the investment is to increase the level of digital skills in enterprises.

The investment consists of provision of basic digital skills trainings by the European Digital Innovation Hubs in cooperation with sectoral associations, educational institutions and Regional Business Centres.

The investment shall be implemented by 30 June 2026.

In order to ensure that the measure complies with the 'Do no significant harm' Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream

use¹⁷; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks¹⁸; (iii) activities related to waste landfills, incinerators¹⁹ and mechanical biological treatment plants²⁰; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation can be selected.

Investment: 2.3.1.3.i. Development of a self-managed learning approach for ICT specialists

The objectives of the investment are to develop a new approach for the preparation of ICT specialists, creating a learning environment for self-managed ICT learning to increase the share of ICT specialists, including women, in the structure of employees.

The investment consists of the development of a learning environment for self-managed ICT training and provision of training for at least 1000 professionals in self-managed ICT learning.

The investment shall be implemented by 31 August 2026.

Investment: 2.3.1.4.i. Development of the individual learning account approach

The objectives of the investment are to develop and approve the concept of individual learning accounts (ILAs) in order to stimulate adult participation in education, in particular improving digital skills.

The investment consists of supporting 3500 adults to acquire digital skills through individual learning accounts. This shall be implemented by making available the best digital learning tools; using specialised solutions for high-quality machine translation and other artificial intelligence technologies, involving education experts in the validation and adaptation of localised content.

The investment shall be implemented by 31 August 2026.

Reform: 2.3.2.r. Digital skills for the digital transformation of society and government

The objective of the reform is to achieve at least basic digital skills level for 54% of inhabitants aged 16-74.

The reform consists of a development of the common framework for the assessment of basic digital skills, the identification and planning of training needs and the assessment.

¹⁷ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

¹⁸ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

¹⁹ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²⁰ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

The reform shall be implemented by 31 December 2022 in relation to setting up the framework, 31 December 2022 for amending higher education standards and 31 August 2026 for reaching digital upskilling targets.

Investment: 2.3.2.1.i. Digital skills for people, including youth

The objectives of the investment are providing support measures for the acquisition of digital skills for people from all groups of society, especially youth; introduction of a systemic approach in municipalities for the development of digital skills; development of digital and technological literacy of young people outside formal education.

The investment consists of the development of digital self-service skills (e-learning courses); provision of self-training and other digital training measures at local level; technological innovation activities in line with Joint Technology Creativity Guidelines for the development of youth technology and innovation capacity; municipalities programmes for the youth. The investment aims to provide basic digital skills for at least 50 000 people, and complete digital skills programmes for youth in all 42 municipalities.

The investment shall be implemented by 31 December 2024 for e-learning course development; trainings, technological innovation activities and municipality programmes shall be implemented by 31 August 2026.

Investment: 2.3.2.2.i. Development of state and local government digital transformation skills and capabilities

The objectives of the investment are to increase the skills of employees of public administration in digital transformation and their use of technologies, in order to develop policies fit for the digital age.

The investment consists of increasing the digital competence and capacity of national government and local government employees.

The investment shall be implemented by 31 August 2026.

Investment: 2.3.2.3.i. Closing the digital divide for socially vulnerable learners and educational institutions

The objectives of the investment are to provide access to learning content and allow participating in remote learning process for the pupils from socially vulnerable groups. A framework for organisation and implementation of remote learning in educational institutions will be approved by end of 2021.

The investment consists of purchasing information and communication technology equipment for general education, to support pupils from socially vulnerable groups. The investment shall be implemented by 31 December 2023.

Reform: 2.4.1.r. Broadband infrastructure development

The objectives of the reform are to promote connected automated driving and to support sustainable mobility, including by improving road safety through innovation.

The reform consists of the adoption of technical requirements for connected and automated driving, and the adoption of a common model for the development of the “last mile”.

The reform shall be implemented by 31 December 2021.

Investment: 2.4.1.1.i. [deleted]

Investment: 2.4.1.2.i. Broadband or very high capacity network “last mile” infrastructure development

The objectives of the investment are to create opportunities for regional development and stimulate demand for new digital services.

The investment consists of providing 6 200 households, businesses and socio-economic drivers with access to very high capacity broadband network.

The investment shall be implemented by 31 August 2026.

B.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Nr	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target

C. COMPONENT 3: REDUCTION OF INEQUALITY

The general objective of this component of the Latvian recovery and resilience plan is to address the challenges of territorial and social inequality in Latvia, exacerbated by the COVID-19 pandemic. The component aims to reduce inequality by creating more jobs in the regions, improving regional connectivity and access to quality services, providing more affordable housing, improving the school infrastructure, helping to up-skill and re-skill workers and unemployed, strengthening the social safety net, improving accessibility to buildings for persons with disabilities, and new long-term care facilities for the elderly. All the measures in the component support either of the two headline reforms – the ongoing administrative territorial reform and the minimum income reform.

The component supports addressing the Country Specific Recommendations on social exclusion, notably to improve the adequacy of minimum income benefits, minimum old-age pensions and income support for people with disabilities and on the quality and efficiency of education and training, focusing on low-skilled workers and jobseekers (Country Specific Recommendation 2, 2019). The component also supports addressing the recommendation to focus investment-related economic policy to the provision of affordable housing, considering regional disparities (Country Specific Recommendation 3, 2019). Finally, the component supports addressing the recommendation to strengthen the social safety net and mitigate the employment impact of the crisis, including through improved active labour market measures and skills (Country Specific Recommendation 2, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

C.1. Description of the reforms and investments for non-repayable financial support

Reform: 3.1.1.r. Administrative territorial reform

The general objective of this reform is to improve the quality of services for the inhabitants of Latvia and improve local business environment by reducing the number of administrative units and increasing the efficiency and accessibility of service delivery. The actions described below (renovation and reconstruction of state regional and local roads, capacity building of local municipalities and planning regions ensuring more efficient public services, development of infrastructure for industrial parks, affordable housing, development of school infrastructure and school busses) are linked with and support this reform measure.

The measure includes the entry into force of a new Municipality Law reviewing the functions and tasks of local governments. The new law shall ensure better governance at the municipal level, a clearer separation and division of competences between the decision-making and the executive powers, and increasing the participation of citizens in the decision-making of local communities.

While the overall administrative territorial reform may continue beyond the timeframe of the RRF, the implementation of the specific reform shall be completed by 31 December 2023.

Investment: 3.1.1.1.i. Improvement of the network of regional and local roads

The general objective of this investment is to renovate or rebuild state regional and local roads to improve road safety ensure the connectivity of the new municipalities and enhance the access of citizens to jobs and services.

The investment measure consists of renovation or rebuilding of 210 km of state regional and local roads in accordance with a priority list of the Ministry of Environmental Protection and Regional Development defined in collaboration with planning regions, *Latvian State Roads* and the Ministry of Transport. As flanking actions under investment 1.1.1.1.i. Competitive rail passenger transport within the common public transport system of the city of Riga, a battery electric train charging infrastructure shall be established in the metropolitan area of Riga and 17 low-emission vehicles (electric buses) shall be procured to complement Latvia's public transport fleet. The main investment measure shall be implemented by 31 December 2024.

Investment: 3.1.1.2.i. Strengthening the capacity of municipalities to improve service efficiency and quality

The general objective of this investment is to improve the quality and efficiency of municipal services following the reorganisation of local administrations. The increased capacity and professional skills of municipalities aims at allowing them to better serve citizens.

This investment measure consists of the adoption of a government regulation defining the scope and parameters of the capacity building actions in the municipalities, municipal public service assessments, provision of methodological support and capacity building of municipal staff, and piloting ways of planning and providing municipal services. Furthermore, the measure shall identify the shortcomings of local government services and actions for their improvement. Finally, the measure shall increase the capacity of 1 300 staff of municipalities and planning regions through dedicated trainings, study visits, exchange of experience, professional assessment and other capacity building measures.

The implementation of the investment shall be completed by 31 August 2026.

Investment: 3.1.1.3.i. Investments in public infrastructure to develop industrial parks in the regions

The general objective of this investment is to support the infrastructure of industrial zones and attract investors and firms to Latvia's regions outside Riga helping to create high added-value and export-oriented jobs and to reduce the development divide between Riga region and the rest of the country.

The measure consists of the adoption of a support programme for the development of industrial parks and territories in the regions; tendering and awarding contracts for the development of industrial parks to private or public sector beneficiaries who have developed an industrial territory or park development strategy or business plan; signing at least four letters of intent or contracts with internationally recognised industrial park operators and/or potential tenants providing for the attraction/execution of additional private sector investments of at least EUR 85 700 000. Finally, the measure includes the completion of the construction of at least four industrial parks of national importance in the regions, including the establishment of necessary utility connections (including heating, water and sewerage, electricity), renewal or installation of access roads near industrial areas, as well as the development of buildings intended for commercial purposes and their related infrastructure. As a result of the measure, at least 328 new jobs with average salaries exceeding the average salaries in the respective economic sector shall be created.

In order to ensure that the measure complies with the 'Do no significant harm' Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream

use²¹; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks²²; (iii) activities related to waste landfills, incinerators²³ and mechanical biological treatment plants²⁴; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The implementation of the investment shall be completed by 31 August 2026.

Investment: 3.1.1.4.i. Establishing a financing fund for the construction of low-rent housing

The general objective of this measure is to stimulate housing supply provide affordable housing, contribute to regional labour mobility, and help attract and retain skilled professionals in the regions.

The measure consists of the entry into force of a new legal framework for rents to ensure a fair balance between the interests of the tenant and the landlord and to ease the resolution of rental disputes; adoption of a housing affordability strategy; entry into force of a low-rent housing regulation defining the size, scope and type of support and criteria for beneficiaries; the approval of projects for at least 467 apartments, and construction of at least 300 apartments within the timeframe of the RRF. The average size of an apartment shall be at least 52 m² and the rent ceiling indicatively at EUR 4.40/m². The approved projects shall meet high quality requirements: the buildings shall be nearly zero-energy and appropriate quality tests (acoustic measurements, building air permeability test) shall be carried out at the time of entry into service.

The implementation of the investment shall be completed by 31 August 2026.

Investment: 3.1.1.5.i. Development of infrastructure and equipment of educational institutions

The general objective of this investment measure is to improve the quality of regional schools by coupling investment with the optimization of school network.

The measure consists of the entry into force of a legal framework establishing the quantitative and qualitative criteria for general secondary education institutions, the adoption of at least 21 decisions by local governments on the reorganisation of schools, and the improvement of school infrastructures. The investments shall improve the school facilities, such as hygienic requirements in classrooms, engineering networks (including ventilation systems), sufficient and energy efficient lighting, and other ergonomic and modern education environment solutions. Investments may also be planned for the purchase of information technology and science, technology, engineering and mathematics

²¹ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

²² Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

²³ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²⁴ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

equipment, for the implementation of new improved curricula and for the implementation of remote and online learning.

The implementation of the investment shall be completed by 31 August 2026.

Investment: 3.1.1.6.i. Purchase of zero-emission vehicles for the performance of municipal functions and related services

The general objective of this investment measure is to improve the performance of the municipal functions and related services with a focus on the mobility of learners in the optimised school network. A secondary objective is to contribute to the greening of public transport in Latvia by investing in zero-emission vehicles.

The measure consists of the entry into force of a government regulation setting out the conditions for municipalities to obtain the support for procuring zero-emission vehicles, procurement process and delivery of 15 zero-emission vehicles (electric buses) for the transport of learners in the regions.

The implementation of the investment shall be completed by 31 December 2025.

Investment: 3.1.1.7.i. Loans to real estate developers for the construction of low-rent dwellings

The measure shall consist of a public investment in a Facility, in order to incentivise private investment in, and improve access to finance in the construction of low-rent dwellings in Latvia. The Facility shall operate by providing loans, directly to the private sector, as well to public sector entities engaged in similar activities. On the basis of the RRF investment, the Facility aims at initially providing at least EUR 29 020 919 of financing.

This investment shall be managed by ALTUM as the implementing partner. This Facility shall include the following product line: direct loans to real estate developers to finance construction of low-rent dwellings.

In order to implement the investment into the Facility, Latvia and ALTUM shall sign an Implementing Agreement that shall include the following content:

- 1) Description of the decision-making process of the Facility: The final investment decision of the Facility shall be taken by an investment committee or other relevant equivalent governing body and approved by a majority of votes from members who are independent from the government.
- 2) Key requirements of the associated investment policy, which shall include:
 - a. The description of the financial product and eligible final beneficiaries.
 - b. The requirement that all investments supported are economically viable.
 - c. The requirement to comply with the ‘Do no significant harm’ (DNSH) principle as set out in the DNSH Technical Guidance (2021/C58/01). In particular, the investment policy shall exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use²⁵, (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmark²⁶, (iii) activities and assets related to waste landfills,

²⁵ Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

²⁶ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established

incinerators²⁷ and mechanical biological treatment plants²⁸. Furthermore, the investment strategy shall require compliance with the relevant EU and national environmental legislation of the final beneficiaries of the Facility.

- d. The requirement that final beneficiaries of the Facility shall not receive support from other Union instruments to cover the same costs.

3) The amount covered by the Implementing Agreement, the fee structure for the Implementing Partner and the requirement to reinvest any reflows according to the investment policy of the Facility.

4) Monitoring, audit, and control requirements, including:

- a. The description of the implementing partner's monitoring system to report on the investments mobilized.
- b. The description of the implementing partner's procedures that will ensure the prevention, detection and correction of fraud, corruption, and conflicts of interests.
- c. The obligation to verify the eligibility of every operation in accordance with the requirements laid out in the Implementing Agreement before committing to finance an operation.
- d. The obligation to carry out risk-based ex-post audits in accordance with an audit plan of ALTUM. These audits shall verify: i) that the control systems are effective, including the detection of fraud, corruption, and conflict of interests; ii) compliance with the DNSH principle and the State Aid rules; and iii) that the requirement that final beneficiaries of the Facility have not received support from other Union instruments to cover the same cost is respected. The audits shall also verify the legality of the transactions and that the conditions of the applicable Implementing Agreement are being respected.

Reform: 3.1.2.r. Access to social and employment services in support of the minimum income reform

The general objective of this reform is to reduce inequality, improve the social safety net, foster social integration and inclusion in Latvia.

The measure consists of two main steps. The first step is the adoption of a plan for improvement of the minimum income support system for 2022-2024 to strengthen the methodology for calculating the minimum income; the adoption of Social Protection and Labour Market Guidelines 2021-2027 to promote the social inclusion of the population, to reduce income inequality and poverty, develop accessible and tailored social services and promote a high level of employment in a quality work environment; the adoption of a Social Services Development Plan 2021-2023 aimed at improving the provision of community-based services; and the adoption of a Plan for the Promotion of Equal Opportunities for Persons with Disabilities 2021-2023, which aims to develop an integrated support system that meets the needs of persons with disabilities. The second step is the entry into force of legislative amendments by the national Parliament to improve the minimum income support system,

for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

²⁷ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²⁸ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

including setting a floor of the minimum income of no less than 20% of the median income and establishing a procedure for annual positive indexation (as of 2023).

The implementation of the reform shall be completed by 31 December 2021.

Investment: 3.1.2.1.i. Measures to promote access to public services and employment for people with disabilities and people with functional impairments

The general objective of this investment measure is to improve access to facilities, jobs and services for people with disabilities thereby contributing to their social inclusion.

The measure consists of selecting 63 public and municipal buildings and retrofitting them to ensure access to the facilities for persons with functional impairments and persons with disabilities. This may include for example vision, hearing, mobility and mental impairment, including improvement of visual information, adaptation and provision of evacuation systems for persons with disabilities, and the installation of aids, such as ramps, pans, lifts, easy-opening or automatic doors. Furthermore, the measure shall include the selection, retrofitting and improving of the physical accessibility of housing for 259 persons with disabilities (persons with severe or very severe disabilities and children with disabilities).

The implementation of the investment shall be completed by 30 June 2026.

Investment: 3.1.2.2.i. Development of a forecast tool

The general objective of this investment measure is to upgrade the macroeconomic modelling capacity to assess the long-term sustainability of the social security system.

The measure consists of tendering and developing econometric models and a methodology for the long-term forecasting of social support, including pensions, developing technical specification for the information system and monitoring the development of the system. The final deliverables shall include an evaluation report on the current situation; a mathematical model for pension forecasting; the evaluation of the current forecasting tool and its potential; technical specifications for the development of an information system; monitoring of the system development throughout the measure.

The implementation of the investment shall be completed by 31 March 2026.

Investment: 3.1.2.3.i. Resilience and continuity of the long-term social care service

The general objective of this investment measure is to enable the transition from institutional long-term care provision to more community-based care model.

The measure consists of developing a standard construction design for new long-term care facilities, conclusion of contracts on the implementation of projects for the establishment of new places for the provision of long-term care services close to the family environment, and construction of new long-term care facilities with 408 service places in 26 buildings for persons of retirement age. The construction of these buildings shall ensure that a maximum of 16 persons are hosted per building and each building is fitted with appliances, equipment and furniture.

The implementation of the investment shall be completed by 30 June 2026.

Investment: 3.1.2.4.i. Synergistic development of social and vocational rehabilitation services for the promotion of the resilience of people with functional impairments

The general objective of this investment measure is to improve the social inclusion and rehabilitation of persons with functional impairments through the development and application of a uniform service standard.

The measure consists of the development, piloting and adoption of a vocational rehabilitation service standard that promotes the maintenance, renewal and acquisition of new education or skills for re-employment for persons with functional impairments. The measure shall also help to improve the infrastructure and equipment in buildings where services shall be provided.

The implementation of the investment shall be completed by 30 June 2026.

Investment: 3.1.2.5.i. Participation in the labour market of unemployed, jobseekers and people at risk of unemployment

The general objective of this investment measure is to improve the upskilling and reskilling of low-skilled workers and unemployed to improve their job opportunities in the labour market.

The measure consists of developing a re-training and up-skilling offer with a focus on digital skills for clients (unemployed, jobseekers, persons at risk of unemployment) of the State Employment Agency (SEA), implementing active labour market policy measures, development of a digital tool for the assessment of skills, and upskilling at least 20 450 persons. Under the measure, the Agency shall focus on a more in-depth individual approach based on the results of a reformed and adjusted profiling system. The investment complements the Active Labour Market Policy (ALMP) measures planned under cohesion funds for period 2021-27, which aims to start after the end of the RRP investment.

The implementation of the investment shall be completed by 31 August 2026.

Investment: 3.1.2.6.i. Facilitating the availability of technical aids

The objective of this investment is to improve access to mobility, self-care, function replacement or restoration and alternative communication technical aids for persons with functional impairments, thereby enhancing their independence and contributing to reducing care needs, including the demand for long-term social care.

The investment consists of the provision of the technical aids service, including the issuance of technical aids, also with advanced functionality (for example: alternative communication technical aids, chin controllability electric wheelchairs).

The implementation of the investment shall be completed by 30 June 2026.

C.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

D. COMPONENT 4: HEALTH

This component of the Latvian recovery and resilience plan contributes to addressing the challenges related to the resilience, accessibility, quality and cost-effectiveness of the health system and its human resources. Timely and equal access to healthcare is limited, especially for vulnerable groups. Latvia reports high unmet needs for healthcare and significant out-of-pocket payments. Unhealthy lifestyles are another important reason for the poor health outcomes. The shortage of health workers hinders the provision of public health care and threatens the success of health care reforms. These challenges have been exacerbated in particular by the crisis caused by the COVID-19 pandemic.

The objectives of the component are to improve the resilience and accessibility of health care by (i) developing a framework and necessary infrastructure for the provision of integrated health services, ensuring the capacity of health institutions to adapt to crisis situations, (ii) developing improved service delivery models and (iii) improving the provision of human resources and the professional development system for health professionals.

The component supports addressing the Country Specific Recommendation to strengthen the resilience and accessibility of the health system including by providing additional human and financial resources (Country Specific Recommendation 1, 2020) and to increase the accessibility, quality and cost-effectiveness of the healthcare system (Country Specific Recommendation 2, 2019).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

D.1. Description of the reforms and investments for non-repayable financial support

Reform 4.1.1.r: Sustainability and resilience of a human-centred, comprehensive, integrated healthcare system.

The objectives of the measure are to develop a human-centred, comprehensive, integrated healthcare system and ensure its sustainability and resilience.

The reform consists of the development of new models for the delivery of effective integrated health services at all levels of healthcare (primary, secondary and tertiary). The reform aims to develop integrated care recommendations and an epidemiological safety framework.

An investment strategy defining infrastructure investment needs shall be prepared by 31 December 2022. The reform shall also contain assessments of the provision of hospital services according to the hospital level and the mapping of hospital services. These elements together with the integrated care recommendations and epidemiological safety framework are prerequisites for the planned investments in the hospitals and secondary outpatient settings as per the investment: 4.1.1.2.i. and 4.1.1.3.i.

In the field of oncology, the measure shall ensure the introduction of uniform methodological management by setting up and preparing for certifying a Latvian cancer care centre, as well as ensuring joint management, treatment and care, and establishing a network of hospitals specialising in the treatment and care of oncological patients.

The investments in the genome project shall create, in accordance with the European “1+ Million Genomes” (1+MG) initiative, a representative collection of reference genome data of Latvian citizens, collecting genetic data samples donated by Latvian citizens. It aims to strengthen Latvia’s

genetic research and digital capacity in order to facilitate secure matching and analysis of these data within the framework of the European 1+MG infrastructure.

With a view to promoting integrated and patient-centred healthcare, improving the accessibility, quality and resource efficiency of health services, a Digital Health Sector Strategy shall be developed in cooperation with the World Health Organisation. This strategy shall serve as a way forward to develop and deploy digital solutions in the health sector that are safe and meet the needs of the industry and its users.

The reform shall be implemented by 31 August 2026.

Investment: 4.1.1.1.i. Support for public health research.

The objective of the measure is to improve the planning and implementation of the public health policy, including to ensure epidemiological safety through the development of patient-centred sustainable integrated health services.

The investment consists of three studies. (i) In the area of the antimicrobial resistance, a study to identify the most effective methods of intervention and monitoring. (ii) A study to identify the reasons for non-vaccination to ensure a wider coverage of vaccination and reduce the risk of spreading infectious diseases in Latvia. (iii) In the area of infectious diseases, a study on the infection risks and their impact on public health indicators.

The key findings of these studies are expected to serve as the basis for improvements of the public health policy. Based on these findings changes are expected in regulatory framework, methodology and recommendations.

The investment shall be implemented by 31 August 2026.

Investment: 4.1.1.2.i.: Support for strengthening the health infrastructure of university and regional hospitals

The objectives of the measure are to strengthen the resilience of the health sector and the availability of services by developing the necessary infrastructure for integrated health services, ensuring the capacity of health institutions to adapt to crisis situations, and ensuring continued sustainable and high-quality state-funded health services. Investments in hospital infrastructure aim to improve the availability of both outpatient and in-patient services.

The investments are planned to be made in three clinical university hospitals and seven regional hospitals for improving their infrastructure and equipment. Investments shall be based on recommendations for integrated care and epidemiological safety requirements and in accordance with the investment strategy for the development of health care infrastructure for 2021-2027. Investments shall be provided for the renovation, refurbishment and construction of new premises as well as for the procurement of the medical technologies and equipment.

The investments to ensure the integrated healthcare approach and make the necessary adaptations for epidemiological safety shall be made in three clinical university hospitals: Riga Eastern Clinical University Hospital, Paula Stradiņa Clinical University Hospital and Children's Clinical University Hospital and seven regional hospitals: Liepaja Regional Hospital; Daugavpils Regional Hospital, Rēzekne Hospital, North Kurzeme Regional Hospital, Jēkabpils Regional Hospital, Vidzeme Hospital and Jelgava Hospital.

The investment shall be implemented by 31 August 2026.

Investment 4.1.1.3.i. Support for strengthening health infrastructure of secondary outpatient service providers

The objectives of the measure are to improve the infrastructure of secondary outpatient service providers to ensure the provision of integrated services, epidemiological safety, and environmental accessibility.

The investment consists of investments in infrastructure and equipment for at least 40 secondary outpatient healthcare service providers.

The investment shall be implemented by 31 August 2026.

Reform 4.2.1.r.: Provision of human resources and upskilling.

The objectives of the measure are to improve the human resources management and upskilling in the health sector.

The reform consists of the development of a human resources strategy that includes a comprehensive approach to the health workforce planning and lifelong learning model, coordination mechanism for training and a simulation approach in training. The human resources strategy for the health sector shall be based on a mapping of human resources.

The strategy shall cover such actions as the development of a new salary model, the provision of basic medical training and the number of residence places in line with demand, retention measures as well as the development of a human resources database. The reform shall also establish a framework to strengthen the medical education system, providing for the introduction of a sustainable model for continuing education and a coordination mechanism to ensure and monitor the quality of educational content, as well as a simulation approach at all levels of education. An IT tool for forecasting the future needs of health workforce shall be developed.

The reform shall be implemented by 31 December 2024.

Investment: 4.2.1.1.i. Support for the implementation of the human resources development system.

The objectives of the measure are to develop a common approach for continuous education in health, and introduce a simulation approach in the health education system.

The investment consists of the establishment of a coordination mechanism and covers aspects such as methodological management, quality control of the education content, sustainable financing.

The investment shall also ensure the development of an action plan for the implementation of a simulation approach in the training process for medical practitioners. The approach shall allow to simulate different real life situations, thus enabling future and existing medical professionals to further develop their skills.

The investment shall be implemented by 31 August 2026.

Reform: 4.3.1.r.: Sustainability of health care, strengthening governance, efficient use of health resources, increase of total public budget in the health sector.

The objectives of the measure are to improve the efficiency of the provision of state-funded health services by ensuring the availability of services, and establishing a systemic change mechanism for state-paid services.

The reform consists of the establishment of a service laboratory system for testing and evaluating different service models. The measure shall cover the examination of the current situation, identification and assessment of the challenges, and development of the solutions such as the new

service models. The new service models shall be piloted and compared with the existing service. The short and long-term benefits and efficiency gains of the models shall be assessed. Based on the results, 10 new service models are expected to be piloted and evaluated for mainstreaming and implemented as part of the state paid service basket.

The reform shall be implemented by 31 August 2026.

Investment: 4.3.1.1.i. Support for assessing and improving the quality and accessibility of non-hospital secondary healthcare.

The objective of the measure is to identify the weak spots in the provision of the state paid non-hospital secondary healthcare services.

The investment consists of a study on the quality and accessibility of state paid non-hospital secondary healthcare services, mapping of comprehensive non-hospital secondary care needs and challenges linked to the implementation of the administrative territorial reform as well as the development of policy recommendations.

The investment shall be implemented by 31 December 2024.

D.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

E. COMPONENT 5: ECONOMIC TRANSFORMATION AND PRODUCTIVITY REFORM

This component of the Latvian recovery and resilience plan consists of two subparts addressing the key challenges in innovation and higher education, respectively. The key innovation-related challenges are the low innovation investment, particularly in the private sector, weak science-business links, the shortage of highly skilled human resources, and the fragmentation of innovation system governance. The key higher education -related challenge is a fragmented higher education landscape, comprised of a relatively large number of small institutions whose funding is both insufficient and ineffective. This means most higher education institutions (HEIs) lack resources to deliver good quality education and to create critical mass for high quality research. Moreover, there is a suboptimal university governance model with a poor representation of external stakeholders and a lack of attractive academic career opportunities, limiting human resources for education, research and innovation.

The objectives of the component are to increase productivity through higher R&D investments, boost competitiveness and foster cooperation between the public sector, businesses, academia and research institutions. The changes to the governance of the innovation system and their accompanying support schemes for private R&D investments are aimed at creating sustainable innovation ecosystems thereby fostering higher overall investment in innovation. The broad-ranging reform of the higher education aims to boost the quality and efficiency of higher education, the competitiveness of Latvia's research and to deliver better skills to Latvia's population in the long term.

The component supports addressing the Country Specific Recommendations to focus investment-related economic policy on innovation (Country Specific Recommendation 3, 2019, Country Specific Recommendation 3, 2020) and to increase the quality and efficiency of education and training (Country Specific Recommendation 2, 2019).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

E.1. Description of the reforms and investments for non-repayable financial support

Reform 5.1.r.: Innovation system governance and private R&D investment motivation

The objective of the measure is to introduce an ecosystem approach in innovation governance. It aims to introduce a support instrument that shall enable increased R&D capacity in enterprises, promote cross-sectoral cooperation, increase the share of innovative enterprises and thereby promote increased private investment in innovation.

The reform consists of the creation of an innovation governance model which shall mean assigning specific tasks to the involved institutions representing the government, the industry and the academia. The key tasks of the innovation system shall be strategy determination, management of innovation fund, data gathering, performance measurement and monitoring, as well as periodical re-assessment of the governance model.

The reform shall be implemented by 31 December 2022.

Investment: 5.1.1.1.i. Operationalisation of a fully-fledged innovation system governance model

The objective of the measure is to support the operationalisation of the new model for the governance of the innovation system and ensure its continuous operation.

The investment aims to mobilise the human resources needed to ensure a coordinated approach in the implementation of innovation support programmes and the monitoring of their performance. Two analytical reports covering all RIS3 areas shall be carried out, including performance of the innovation support programme, as well as recommendations for possible programme improvements.

The investment shall be implemented by 31 August 2026.

Investment: 5.1.1.2.i. Support for research and internationalization

The objective of the investment is to increase the volume of private R&D investments through targeted public investments that shall promote the development of new products and technologies, as well as knowledge transfer within the economy.

The investments shall fund four programmes with the following indicative amounts: i) competence centre support programme for EUR 25 million, ii) research support programme for EUR 47 million, iii) cooperation networks support programme for EUR 5 million, and iv) support programme for participation in Important Projects of Common European Interest (IPCEI) for EUR 31 million. A closed call for support shall be organised for i) competence centres support programme. An open call shall be organised for the selection of ii) private intermediaries for implementation of the private sector R&D support programme, iii) intermediaries for implementing the cooperation networks support programme, and iv) projects eligible to participate in IPCEI. Emphasis shall be placed on building complete innovation ecosystems, covering existing cooperation networks, ensuring strategic specialisation and innovation development within the entire local value chain, which shall ensure closer integration of Latvian enterprises into global value chains. The selected entities shall be tasked with the (i) implementing the support programme for private research and development projects, (ii) export promotion activities, (iii) networking and exchange of experience activities, (iv) implementation of support programme for participation in EU-level research programmes and international cooperation networks, (v) implementing the support programme for the involvement of Latvian enterprises in industrial alliances at EU level and planned IPCEIs and (vi) collecting data from the beneficiaries to inform the assessment and monitoring activities.

The investment is expected to ensure the development of new innovative products and shall cover such expenses as industrial research, experimental development, feasibility studies, co-financing for participation in European and international R&D projects. The funding shall be ensured for participation in planned IPCEI, including in the fields of next generation cloud and edge computing. A government agency shall determine the most suitable project(s) for IPCEI participation and shall include appropriate provisions in the action plan attached to the implementation of this measure.

The investment shall be implemented by 31 August 2026.

Reform 5.2.1.r.: Reform of Higher Education and Scientific Excellence and Governance

The objectives of the reform are to increase the international competitiveness of higher education institutions.

The reform concerns structural changes in three pillars: (i) the governance through establishing a separate academic and strategic decision-making, involving external members; (ii) funding that shall be allocated according to the results achieved according to national priorities and higher education institution typology objectives; and (iii) human resources by developing a new and unified career

model for academic and scientific staff in line with best global practice, promoting the attraction and retention of global staff, especially the diaspora in Latvia.

By 31 December 2022, the measure shall ensure the entry into force of the regulatory framework for implementing the reform of the governance of the higher education system covering (i) higher education institution typologies and criteria for qualifying for a particular type; (ii) the procedure for the establishment and approval of higher education institution councils, the competence of the councils, while clarifying the competences of the Senate, the Rector and the Constitutional Assembly; (iii) the procedure for selecting and approving new university reactors; (iv) defining the strategic specialisation of higher education institutions .

At least four consolidation plans of institutions of higher education shall be approved and eligible for consolidation grants (investment: 5.2.1.1.i. Research, development and consolidation grants).

The measure shall ensure the entry into force of legal provisions (i) introducing a new doctoral model; (ii) introducing cyclical institutional accreditation of higher education institutions and colleges; (iii) further development of the financing model for higher education and (iv) linking public funding to the results of the international evaluation of scientific institutions.

By 31 August 2026, all public higher education institutions shall implement the new governance model, including changes to the internal governing bodies, established the criteria for election of the rector in accordance with the requirements of the law, appointed a management team.

Investment: 5.2.1.1.i. Research, development and consolidation grants

The objectives of the investment are to reduce the number of higher education institutions and scientific institutes through consolidation. The plan shall finance grants that shall incentivise higher education mergers.

The approved consolidation plans of the higher education institutions shall include an investment plan. This may cover grants for structural change; exit grants for termination of employment with academic staff over 65 years of age; digitalisation, technological development, improvement of research and education infrastructure (excluding construction) and creation of new programmes of excellence.

The investment may cover grant agreements concluded by the universities or research institutes for doctoral grants, post-doctoral grants or scientific (professor) grants as well as in-house research grants.

The investment shall be implemented by 31 August 2026.

F. COMPONENT 6: RULE OF LAW

This component of the Latvian recovery and resilience plan consists of four subparts that address the key challenges in tax compliance, law enforcement dealing with economic crime, public administration and public procurement. The key addressed challenges related to tax compliance are undeclared wages and employment, tax fraud, and smuggling. The key challenges related to economic crime are shortage of investigators, prosecutors and judges with specific knowledge in areas of economic crime. Key challenges related to public administration are the need to strengthen and improve its capacities, efficiency, transparency and accountability. While overall, Latvia's performance in the area of public procurement is satisfactory, there are several challenges that require further attention, namely the need to increase the efficiency, transparency and quality of public procurement procedures, foster the competition and strengthen human and analytical capacities, including, professional qualifications of procurers.

The objectives of the component are to reduce the shadow economy and foster a fairer business environment, to improve the quality and efficiency of the judicial system, particularly with respect to fighting economic crime, to modernise the public administration as well as to improve the quality, efficiency and integrity of public procurement.

The component supports addressing the Country Specific Recommendations to improve tax compliance (Country Specific Recommendation 1 2019), to strengthen the accountability and efficiency of public administration (Country Specific Recommendation 4 2019), and to continue progress on the anti-money laundering framework (Country Specific Recommendation 4 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

F.1. Description of the reforms and investments for non-repayable financial support

Reform: 6.1.1.r. Strengthening analytics and developing data management in the field of tax administration and customs

The objective of this measure is to improve the quality and efficiency of compliance risk management and other activities related to fight against shadow economy through a broad set of measures, including the adoption of a comprehensive action plan for fighting the shadow economy, introducing a new taxpayer segmentation system and adjusting the audit and control practices to better target the risk of non-compliance. The measure also includes investment in research of taxpayer behaviour that shall be used to design a more effective policy response to tax avoidance and evasion.

The reform consists of: a) adoption of a national work plan to restrain the shadow economy for 2021 – 2022, b) the establishment of a taxpayer rating system and the related optimisation of audits and controls and tailoring of state revenue service (SRS) services, c) development of a handbook for recognising risks of undeclared wages, d) commissioning of research and policy recommendations in the area of the shadow economy.

The reform shall be implemented by 30 June 2024.

Investment: 6.1.1.1.i. Modernisation of existing analytical solutions

The objective of this measure is to migrate existing risk systems to a single analytical platform and to modernise individual taxpayers' risk system and the excise tax risk system.

The investment consists of a) the implementation of a System of Risks for Individual Taxpayers, b) the implementation of Excise Tax Risk Management System, and c) the transfer of the ESKORT system to the SAP HANA database.

The investment shall be implemented by 30 June 2024.

Investment: 6.1.1.2.i. Development of new analytical systems

The objective of this measure is to implement a new taxpayer segmentation system, ensure its integration with the 360 degree system of taxpayer analysis and ensure its integration with the database of publicly available information.

The investment consists of the implementation of an IT system for taxpayer segmentation according to their compliance risk, including integration with a published database and data visualisation in the Electronic Declaration System, b) integration of the new system with the 360 degrees analysis of the taxpayer.

The investment shall be implemented by 30 June 2024.

Investment: 6.1.1.3.i. Personnel training to work with an analytical platform and consultancy

The objective of this measure is to provide training for SRS specialists to work with the SAP HANA technology platform.

The investment consists of training 50 SRS specialists for working with SAP HANA platform. The training shall be aimed at risks analysts and system administrators.

The investment shall be implemented by 31 December 2023.

Reform: 6.1.2.r. Remote and centralised analysis of images scanned at customs control points

The objective of this measure is to link x-ray scanners for railway cargo placed at customs control points in Karsava and Indra with a single analysis system placed in Riga allowing for centralized remote image analysis.

The reform entails ensuring 95% of cargo image analysis is carried out remotely through the BAXE system.

The reform shall be implemented by 31 August 2026.

Investment: 6.1.2.1.i. Linking railway x-ray equipment to BAXE and use of artificial intelligence for rail freight scanning image analysis

The objective of this measure is to ensure the ability to perform analysis of railway cargo images scanned at customs control points Indra and Karsava remotely.

The investment consists of a) connecting railway scanners at customs control points in Indra and Karsava to BAXE information system and b) developing an x-ray image analysis platform employing artificial intelligence.

The investment shall be implemented by 31 March 2026.

Investment: 6.1.2.2.i. Capacity building of the Customs Laboratory

The objective of this measure is to allow the customs to control smuggling, counterfeit products and illegal substances more effectively.

The investment consists of equipping the customs laboratory and the customs control point at Riga airport with a spectrophotometer.

The investment shall be implemented by 31 December 2022.

Investment: 6.1.2.3.i. Improvement of customs control of received postal items at Airport customs control point

The objective of this measure is to improve the control efficiency of incoming postal consignments received at Riga International Airport customs control point.

The investment consists of equipping the Riga airport mail sorting facility with a smart scanning and sorting line.

The investment shall be implemented by 31 March 2025.

Investment: 6.1.2.4.i. Creation of infrastructure for the performance of control services in Kundzinsala

The objective of this measure is to increase the efficiency of customs controls, reduce the administrative burden on the control service users, and to eliminate wasteful traffic of heavy-duty transport between the port and the control facilities.

The investment consists in creating an integrated control services infrastructure in Kundzinsala –a port and a major cargo transport hub in Riga. The control post shall require construction of control services facilities necessary for effective and smooth controls as well as installing x-ray scanning equipment for cargo control.

The investment shall be implemented by 31 August 2026.

Reform: 6.2.1.r. Modernisation of the process of identifying money laundering, investigating economic crimes and judicial proceedings

The objective of this measure is to improve the efficiency of the system for reporting suspicious transactions.

The reform consists of a) amending the Law on the prevention of money laundering and terrorist and proliferation financing to eliminate parallel reporting of suspicious transactions to both the Financial Intelligence Unit and the State Revenue Service and to introduce provisions for new data reception and analysis system, b) adoption of a regulation by the Cabinet of Ministers prescribing procedure and content of suspicious transaction reports and threshold declarations.

The reform shall be implemented by 30 June 2021.

Investment: 6.2.1.1.i. Establishment of AML Innovation Hub to improve the identification of money laundering

The objective of this measure is to facilitate research and information sharing between the institutions involved in fight against money laundering.

The investment consists of the introduction of information systems, the establishment of dedicated rooms for knowledge sharing and cooperation, creation of inter-system connections for automated

data exchange, establishment of data processing infrastructure and mobilisation of researchers to develop analytical solutions.

The investment shall be implemented by 31 March 2025.

Investment: 6.2.1.2.i. Strengthening the capacity to investigate economic crime

The objective of this measure is to increase the availability and capacity of law enforcement officials dealing with economic crime. The measure consists of both investment and reform elements.

The investment consists of a) training of speech recognition IT tool for the purposes of using it in the economic crime investigation process, b) training law enforcement officials to obtain a Criminal Anti Money Laundering Certificate and c) equipping law enforcement officials and units with electronic data processing and recording devices suitable for remote work.

The investment shall be implemented by 31 March 2025.

The reform consists of the adoption of a progress report on the implementation of an action plan for strengthening the fight against economic crime. The plan shall be based on the recommendations received under the Structural Reform Programme and further detailed by the State Police. The plan shall clearly define the activities to be implemented, the deadlines and the bodies responsible for implementation. The action plan shall also ensure consistency with the priorities of the Prevention of Money Laundering, Terrorist Financing and Proliferation Plan.

The reform shall be implemented by 31 December 2025.

Investment: 6.2.1.3.i. Establishment of a single training centre for the development of the qualifications of judges, court staff, prosecutors, assistant prosecutors and specialised investigators (interdisciplinary matters)

The objective of this measure is to improve the qualifications of the human resources of the judicial system by creating a unified training centre for judges, court staff, prosecutors, assistant prosecutors and specialised investigators (in interdisciplinary matters). The measure consists of both investment and reform elements.

The reform shall consist of a) passing of the law establishing the justice training centre and b) ensuring long-term financing for the operation of the justice training centre in the state budget law.

The reform shall be implemented by 31 March 2025.

The investment shall consist of a) refurbishment and equipment of the premises for the training centre, b) a complex approach to the development of professional competences of judicial authority, and c) development and implementation of training programmes.

The investment shall be implemented by 31 July 2026.

Reform: 6.3.1.r. Modernisation of public administration

The objective of this measure is to take the first step in modernizing the public administration, which means making it more efficient and innovative and a more attractive place to work to deliver better policy and services to citizens as well as addressing the new challenges that have emerged in the context of the COVID-19 crisis.

The reform consists of a) adoption of a plan for the modernisation of public administration, b) development of a concept and its gradual implementation of a single service centre, starting the centralization of public administration support functions, which is part of the modernization plan.

The reform shall be implemented by 31 August 2026.

Investment: 6.3.1.1.i. Open, transparent, fair and accountable public administration

The objective of this measure is to increase public officials' competences in the areas of ethics, anti-corruption, prevention of fraud and conflict of interest.

The investment consists of a) setting up a competence framework in the areas of ethics, anti-corruption, prevention of fraud and conflict of interest, and b) training of at least 16 232 public officials in the areas of ethics, anti-corruption, prevention of fraud and conflict of interest.

The investment shall be implemented by 31 August 2026.

Investment: 6.3.1.2.i. Professionalisation of public administration and administrative and capacity building

The objective of this measure is to increase public officials' competencies in the areas of customer service, development of leadership, basic competences of public administration, management of public procurement, policy planning and implementation, human resources and legal practice.

The investment consists of a) establishing competence development and training programmes, and b) training at least 20 011 public officials in the areas of where there are skills shortages among public officials.

The investment shall be implemented by 31 August 2026.

Investment: 6.3.1.3.i. Development of the innovation ecosystem of public administration

The objective of this measure is to foster the innovation culture and increase the innovation output within public administration. The measure consists of both investment and reform elements.

The reform consists of a) the adoption of a regulatory framework to support the development of the public sector innovation ecosystem and b) setting up and running of a public administration innovation lab.

The reform shall be implemented by 30 June 2025.

The investment consists of a) hiring of experts in innovation-relevant areas, b) setting up and equipping facilities for co-creating activities and c) piloting some of the innovations created in the innovation lab.

The investment shall be implemented by 30 September 2025.

Investment: 6.3.1.4.i. Growth of non-governmental organisations to strengthen social security representation and monitor public interests

The objective of this measure is to support public initiatives and dialogue in the areas of social resilience and advocacy of public interest.

The investment consists of a) establishment of a support programme for non-governmental organisations in the areas of public advocacy and social resilience and b) strengthening, development and improving the experience of at least 30 non-governmental organisations in the areas of social resilience and public advocacy.

The investment shall be implemented by 31 August 2026.

Reform: 6.4.1.r. Creation of a register of public procurement contracts

The objective of this measure is to increase the transparency and availability of information regarding the execution and actual performance of contracts concluded thus improving the conduct of procurers and suppliers and reducing corruption risks during the implementation phase of public procurement.

The reform consists of a) amending the law of public procurement mandating the publication of the relevant additional information and b) development of a technical solution for the register of public procurement contracts and making it available online.

The reform shall be implemented by 31 December 2022.

Reform: 6.4.2.r. Improvement of the Competition Environment

The objective of this measure is to improve the competition and reduce conflict of interest and risks of corruption in public tenders as well as to make value-for-money criteria more broadly used in public procurement.

The reform consists of amending the rules with respect to conflict of interest requirements of for procurement commissions, mandating a broader use of qualitative criteria for contract award, mandating a broader use of market consultations, and broadening exclusion criteria for bidders.

The reform shall be implemented by 31 December 2021.

Reform: 6.4.3.r. Development and implementation of a professionalisation strategy

The objective of this measure is to raise the quality and efficiency of public procurement while optimising resources used by developing competencies, skills and capacities of public procurers.

The reform consists of a) establishing standardised qualification requirements for suppliers of certain services, which are yet to be specified, b) requiring the use of standardised acceptance-transfer documents in construction procurements, c) developing a unified training programme for public procurers, d) setting requirements for procurement commission competence in procurements reaching a certain threshold of contract prices and e) centralising public procurement in areas deemed appropriate for it.

The reform shall be implemented by 31 August 2026.

Reform: 6.4.4.r. IUB IT and analytical capacity building

The objective of this measure is to improve the effectiveness of preventive measures to ensure a timely identification of risky public procurement (i.e. identification of risks in specific sectors, in the activity of particular contracting authorities or in the conduct of specific procurement).

The reform consists of a) establishing criteria for identifying risky market sectors, customers and purchases, and b) implementing a publications management system allowing for better data analytics, optimisation of processes and improving the transparency of procurement data.

The reform shall be implemented by 31 December 2024.

F.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Nr	Related measure (reform or investment)	Milestone / target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description and clear definition of each milestone and target

										practices from other countries, such as the Index tool.
214	6.4.4.r. IUB IT and analytical capacity building	Milestone	Upgrade of publications management system completed	Upgrade of publications management system completed				Q4	2024	A publications management system is available, ensuring: - online access, - publication of e-forms, - overview of procurement statistics, - availability of client profiles, - module for procurement complaints process, - module for carrying out pre-checks, - module for administrative infringement process cases, - verification of convicted persons before their inclusion in the procurement commission.

G. COMPONENT 7: REPowerEU

The objectives of the REPowerEU chapter of the Latvian recovery and resilience plan are:

- to increase the share and accelerate the deployment of renewable energy by i) implementing smart electricity grid management solutions both at transmission and distribution levels, ii) increasing the grid capacity to accommodate a higher integration of variable renewable energy and iii) introducing new frameworks for energy communities and self-consumers;
- to address energy poverty by supporting and promoting energy communities;
- to address internal and cross-border energy transmission and distribution bottlenecks by digitalising, modernising and securing the national electricity transmission and distribution networks, and by introducing provisions for electricity network optimisation;
- to support electricity storage and to increase energy security by investing in the installation of a Battery Energy Storage System and in cybersecurity solutions for critical energy transmission infrastructure; and
- to increase the uptake of sustainable biomethane by creating a regional biomethane injection point and by establishing a legal framework for injecting sustainable biomethane into the existing natural gas network.

Of the four measures in the Latvian REPowerEU chapter, two have a cross-border and multi-country dimension and effect. The investment measure covering the installation of a Battery Energy Storage System is precisely aimed at complementing a cross-border project implemented by Latvia, Lithuania, Estonia and Poland aimed at ensuring full synchronisation of the Baltic States' electricity networks with the Continental Europe network. This investment also encompasses ancillary activities aimed at enhancing cybersecurity of critical infrastructures and at ensuring stable operation of the transmission network after the synchronisation, in view of a greater integration of renewable energy sources. The investment on upgrading, digitalising and securing the electricity transmission and distribution networks also has a cross-border and multi-country dimension and effect, as it is expected to contribute to removing bottlenecks in energy flows and to facilitating the integration of renewable energy sources in the networks.

The two investments account for 99% of the estimated costs of the chapter.

The REPowerEU chapter contributes to addressing recommendations to reduce overall reliance on fossil fuels (country-specific recommendation 4.1 2023) by accelerating the deployment of renewables (country-specific recommendation 4.2 2023), and to ensure sufficient capacity of interconnections to increase security of supply and continue synchronisation with the EU electricity grid (country-specific recommendation 4.3 2023).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the 'Do not significant harm' Technical Guidance (2021/C58/01).

G.1. Description of the reforms and investments for non-repayable financial support

Reform 7.1.r. Transforming the national energy sector

The objective of this measure is to reduce overall reliance on fossil fuels and to advance Latvia's goal of becoming a green energy exporting country.

The reform aims at i) introducing a regulatory framework laying down the conditions and procedures for the registration and operation of energy communities, and supporting vulnerable groups of society; ii) introducing amendments to norms on electricity trade and consumption promoting self-consumers and owners of micro-generator facilities; iii) laying down conditions for a more optimised use of existing transmission and distribution networks; and iv) laying down conditions for increasing the uptake of sustainable biomethane to be injected into existing natural gas network.

The reform shall cover the following elements.

1. The reform shall create a regulatory framework for energy communities by i) setting the conditions and procedures for registering and operating the energy communities, ii) introducing an obligation for electricity traders to offer at least one product for the purchase of electricity from energy communities, and iii) introducing an obligation for local and regional authorities to channel part of the electricity produced within an energy community, or of the economic benefit derived from it, to vulnerable groups.
2. The reform shall i) introduce the possibility of using the electricity generated on the facility of one electricity user to cover the consumption needs of another facility of the same user, with the only restriction that the facilities shall be located in the national territory and connected to the national grid; ii) create an obligation for electricity traders to offer at least one product for the purchase of electricity from self-consumers operating a micro-generator facility; and iii) introduce the condition that energy sharing be possible beyond the multi-apartment building without the need to create an energy community.
3. The reform is expected to contribute to the optimisation of the use of grid capacity by electricity generation and storage facilities. It shall i) allow access to a grid connection point for power plants that might use different generation technologies and whose combined generating capacity exceeds the capacity of the grid connection point, and ii) provide conditions for the operation of such combined generating capacities and for turning on and off certain generation facilities.
4. The reform shall lay down the conditions under which sustainable biomethane transported outside the natural gas transmission and distribution networks is injected into the natural gas network.

The implementation of the measure shall be completed by 31 December 2025.

Investment 7.2.i. Security and stability of energy supply, and synchronisation with the Union grid

The objective of this investment is to increase the security and stability of energy supply, and to support the synchronisation of the national electricity grid with the Continental Europe electricity networks.

The investment shall result in:

- i) the installation of a 60 MW Battery Energy Storage System in Rēzekne;
- ii) the implementation of a cybersecurity solution for critical energy transmission infrastructure;
- iii) the development of a concept, and the purchase and installation of software solutions, for the smart management of renewable electricity connections to the national electricity transmission grid.

The investment is expected to be implemented by the national transmission system operator. The activity under point iii) is expected to be implemented in cooperation with the national distribution system operator, as well as with Estonian and Lithuanian transmission system operators.

The implementation of the measure shall be completed by 31 December 2025.

Investment 7.3.i. Upgrading, digitalising and securing the electricity transmission and distribution networks

The objective of this investment is to contribute to the clean energy transition and to increase electricity security by increasing the electricity grid capacity and flexibility to accommodate a greater integration of variable renewable energy, by refurbishing transmission networks, and by digitalising distribution networks. The investment shall cover the following elements.

1. To increase the national electricity grid capacity and flexibility to accommodate a greater integration of variable renewable energy, the investment shall deliver 70 MW of new electricity grid capacity, the construction of a digital substation in Kuldīga and the refurbishment of a substation in Carnikava.

2. To modernise energy transmission lines and increase the security and stability of electricity supply, the investment shall result in the replacement of at least 150 km of existing medium-voltage overhead power lines with cable lines.

3. To digitalise the electricity distribution network for a more efficient and flexible management of energy flows, the investment shall result in:

- the implementation of an advanced smart distribution management solution;
- the purchase and installation of remotely controlled medium voltage circuit breakers on cable lines in transformers substations and on lines at different switching points.

4. Two studies shall be completed that are expected to contribute to Latvia's development towards becoming a green energy exporting country. The objective of the first study is to determine the maximum amount of renewable energy that could be connected to the electricity transmission network and assess the impact of higher renewable energy sources volumes on the network. The second study has the objective of estimating electricity consumption growth and electrification potential over a 10-year timeframe. Furthermore, an Environmental Impact Assessment for an electricity transmission line project between Ventspils, Brocēni and Telšiai shall be carried out.

The implementation of the measure shall be completed by 31 August 2026.

Investment 7.4.i. Increasing the uptake of sustainable biomethane

This measure is aimed at increasing the uptake of sustainable biomethane in line with the sustainability and greenhouse gas emissions savings criteria from Articles from 29 to 31 and the rules on food and feed-based biofuels set out in Article 26 of the revised Renewable Energy Directive 2018/2001/EU, and related implementing and delegated acts. The measure shall result in:

- i) the construction of a new regional sustainable biomethane injection point (BIP).
- ii) the purchase and installation of an IT solution for the management of the new regional BIP, including the introduction of biomethane leak detection and prevention standards.

The implementation of the measure shall be completed by 31 August 2026.

G.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Nr	Related measure (reform or investment)	Milestone / target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description and clear definition of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
215	7.1.r. Transforming the national energy sector	Milestone	Regulations establishing a framework for registering and operating energy communities	Legal provisions indicating the entry into force of the regulations	N/a	N/a	N/a	Q4	2024	Entry into force of the regulations of the Cabinet of Ministers, which shall: - set the conditions and procedures for registering and operating energy communities; - introduce the obligation for local and regional authorities to direct a part of the amount of electricity produced in the energy community, or the economic benefit obtained from it, to vulnerable groups of society; - introduce the obligation for electricity traders to offer at least one product for the purchase of electricity from energy communities.
216	7.1.r. Transforming the national energy sector	Milestone	Legislation amending norms on electricity trade and consumption	Legal provisions indicating the entry into force of the legislation amending the norms on electricity trade and consumption	N/a	N/a	N/a	Q1	2024	Entry into force of amendments to the norms on electricity trade and consumption, which shall introduce: - the condition that energy sharing be possible beyond the multi-apartment building without the need to create an energy community; - the possibility to use the amount of electricity produced in the facility of one electricity user to cover the consumption needs of another facility of the same user, regardless of the location of the facilities. The only limitations are that the facilities

2. ESTIMATED TOTAL COST OF THE RECOVERY AND RESILIENCE PLAN

The estimated total cost of the recovery and resilience plan of Latvia is EUR 1 969 244 522.

The estimated total cost of the REPowerEU chapter is EUR 134 743 378.

SECTION 2: FINANCIAL SUPPORT

1. Financial contribution

The instalments referred to in Article 2(2) shall be organised in the following manner:

1.1. First Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
77	2.3.2.3.i. Closing the digital divide for socially vulnerable pupils and educational institutions	Milestone	Entry into force of a regulatory framework laying down procedures for the organisation and implementation of remote learning
80	2.4.1.r. Broadband infrastructure development	Milestone	Adoption of technical requirement for connected and automated driving
81	2.4.1.r. Broadband infrastructure development	Milestone	Adoption of a common model for the development of the last mile
98	3.1.1.4.i. Establishing a financing fund for the construction of low-rent dwellings	Milestone	Entry into force of the law balancing the rights of tenants and landlords
104	3.1.1.5.i. Development and equipping of educational institutions' infrastructure	Milestone	Definition of qualitative and quantitative criteria adopted
110	3.1.2.r. Access to social and employment services in support of minimum income reform	Milestone	Adoption of the strategic framework for further development of the minimum income support system
186	6.2.1.r. Modernisation of the process of identifying money laundering, investigating economic crimes and judicial proceedings	Milestone	Entry into force of amendments to the Law on the prevention of money laundering and terrorist and proliferation financing
209	6.4.2.r. Improvement of the Competition Environment	Milestone	Entry into force of regulatory framework for improving the competition environment and

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			reducing corruption risks in public procurement.
213	6.4.4.r. IUB IT and analytical capacity building	Milestone	Adoption of criteria for identifying risky market sectors, customers and purchases
		Instalment Amount	EUR 231 000 000,00

1.2. Second Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
7	1.2.1.1.i. Improving the energy efficiency of multi-apartment buildings and transition to renewable energy technologies	Milestone	Entry into force of support programme for improving energy efficiency in residential buildings
10	1.2.1.2.i. Increasing energy efficiency in business in the form of a combined financial instrument	Milestone	Entry into force of the Support Programme for Entrepreneurial Energy Efficiency
13	1.2.1.3.i. Improving municipal buildings and infrastructure by promoting the transition to renewable energy technologies and improving energy efficiency	Milestone	Entry into force of the legal framework for a support programme to improve energy efficiency in municipal infrastructure, which supports projects with a planned reduction of primary energy or CO2 by at least 30 %.
16	1.2.1.4.i. Improving the energy efficiency of public sector buildings, including historical buildings	Milestone	Entry into force of support programme for improving energy efficiency in national and historical buildings
22	1.3.1.r. Disaster management system adaptation to climate change, rescue and rapid response services	Milestone	Publication of a report on implementation of the disaster risk management system
27	2.1.1.r. Modernisation of national processes and services and digital transformation	Milestone	Establishment of a framework for unified governance management of ICT development activities in public administration
28	2.1.1.r Modernisation of national processes and services and digital transformation	Milestone	Establishment of a normative framework for receiving support in the field of digital transformation of public

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			administration processes and services
31	2.1.2.r. Increasing efficiency and interoperability in the use of national ICT resources	Milestone	Establishment of the legal framework for receiving support in the area of development of central systems and platforms of public administration and consolidation of computing infrastructure services
37	2.1.3.r. Development of the national economic data and digital services economy	Milestone	Entry into force of the legal framework for receiving support in the field of transformation of economic data management
40	2.2.1.r. Creating the full cycle of business digital transformation support with regional coverage	Milestone	The European Digital Innovation Hub (EDIH) has been established
41	2.2.1.r. Creating the full cycle of business digital transformation support with regional coverage	Milestone	Regional business support centres provide new digital transformation support functions
42	2.2.1.r. Creating the full cycle of business digital transformation support with regional coverage	Milestone	Establishment of a digital maturity test system for entities to identify the actions needed by the entities and state support.
69	2.3.2.r. Digital skills for the digital transformation of society and government	Milestone	The normative framework strengthens and implements a common framework for assessment of basic digital skills, identification and planning of training needs and assessment
70	2.3.2.r. Digital skills for the digital transformation of society and government	Milestone	Amendments have entered into force to normative acts on national higher education standards, envisaging achievement of digital competence study results at the corresponding levels of the Latvian Qualification Framework.
85	3.1.1.1.i. Improvement of the network of regional and local roads	Target	Renovated or rebuilt regional and local roads for the safe

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			accessibility of the county administrative centres and their services and jobs and for the full functioning of the new municipalities.
89	3.1.1.2.i. Strengthening the capacity of municipalities to improve the efficiency and quality of their operations	Milestone	The legal basis for implementing support for capacity building of local governments has been adopted
93	3.1.1.3.i. Investments in business public infrastructure for the development of industrial parks and areas in regions	Milestone	Adoption of a support programme for the development of industrial parks and territories in the regions
99	3.1.1.4.i. Establishing a financing fund for the construction of low-rent dwellings	Milestone	Adoption of a housing affordability strategy
100	3.1.1.4.i. Establishing a financing fund for the construction of low-rent dwellings	Milestone	Government regulation on the construction of low-rent dwellings
105	3.1.1.5.i. Development and equipping of educational institutions' infrastructure	Milestone	Adoption of decisions by local councils on the reorganisation of at least 20 general secondary education institutions
107	3.1.1.6.i. Purchase of zero-emission vehicles for the performance of municipal functions and services	Milestone	A support programme has been adopted for local governments for the purchase of electric buses for the performance of the municipal functions and related services
112	3.1.2.1.i. Measures to promote access to public services and employment for people with disabilities and people with functional impairments	Milestone	Selection of state and local government buildings where environmental adaptations shall be carried out
118	3.1.2.2.i. Development of a forecast tool	Milestone	Conclusion of contract for the development of algorithms for the forecasting model, the development of technical specifications for information system and the supervision of system development
121	3.1.2.3.i. Resilience and continuity of the long-term social care service	Milestone	Development of standard construction design

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
131	4.1.1.r. Sustainability and resilience of a human-centred, comprehensive, integrated healthcare system	Milestone	Adoption of a digital health strategy
132	4.1.1.r. Sustainability and resilience of a human-centred, comprehensive, integrated healthcare system	Milestone	Development of a human-centred, comprehensive, integrated healthcare delivery model through the development of an investment strategy and recommendations for the development of integrated and epidemiologically safe health care
135	4.1.1.1.i. Support for public health research	Milestone	Adoption of a methodology for three studies to improve public health policy planning and implementation in the field of antimicrobial resistance, vaccination and infectious diseases
138	4.1.1.2.i. Support for strengthening the health infrastructure of university and regional hospitals	Target	Number of projects which received a positive opinion of the Technology Commission on the eligibility of equipment for the provision of the relevant state-funded services
149	4.3.1.r. Sustainability of health care, strengthening governance, efficient use of health resources, increase of the total public budget in the health sector	Milestone	Coordination mechanism approved to assess, develop and implement new healthcare service delivery models services
151	4.3.1.1.i. Support for assessing and improving the quality and accessibility of non-hospital secondary healthcare	Milestone	Adoptions of a methodology for the study on the quality and availability of non-hospital secondary healthcare
154	5.1.r. Innovation system governance and private research & development investment motivation	Milestone	Development of a long-term national strategy for each of the RIS3 areas and establishment of a Strategic Steering Board for each of the RIS3 areas
159	5.2.1.r. Reform of Higher Education and Scientific Excellence and Governance	Milestone	Reform of the governance of higher education institutions

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
166	6.1.1.r. Strengthening analytics and developing data management in the field of tax administration and customs	Milestone	Adoption of work plan for public authorities to curb the shadow economy 2021-2022
167	6.1.1.r. Strengthening analytics and developing data management in the field of tax administration and customs	Milestone	Entry into operation of a taxpayer rating system, optimisation of controls
170	6.1.1.r. Strengthening analytics and developing data management in the field of tax administration and customs	Target	Implementation of the national research programme “Reducing the shadow economy to ensure the sustainable development of the country”
178	6.1.2.2.i. Capacity building of the Customs Laboratory	Milestone	Purchased and installed spectrophotometer for use in the Customs Laboratory
179	6.1.2.2.i. Capacity building of the Customs Laboratory	Milestone	Purchased and installed spectrophotometer for use in Airport customs control point
196	6.3.1.r. Modernisation of public administration	Milestone	Approved Plan for Modernisation of Public Administration
198	6.3.1.r. Modernisation of public administration	Milestone	Concept of the Single Service Centre approved as a prerequisite for the provision of centralised services
206	6.3.1.4.i. Growth of non-governmental organisations to strengthen social security representation and monitor public interests	Milestone	Publication of the framework for the support of non-governmental organisations in areas of: - social resilience; - advocacy of public interest
208	6.4.1.r. Creation of a register of public procurement contracts	Milestone	A register of public procurement contracts made available.
210	6.4.3.r. Development and implementation of a professionalisation strategy	Milestone	Adoption of a strategy for the professionalization of procurers
211	6.4.3.r. Development and implementation of a professionalisation strategy	Milestone	Amendments to the relevant legal acts, regulation and internal procedures
		Instalment Amount	EUR 388 000 000,00

1.3. Third Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
1	1.1.1.r. Greening the Riga Metropolitan Range Transport System	Milestone	Coordinated approach for passenger transport planning, ordering and organisation of the Riga metropolitan area
19	1.2.1.5.i. Modernisation of electricity transmission and distribution networks	Target	Notification of contracts award to projects approved for EUR 80 000 000.
29	2.1.1.1.i. Administration modernisation and digital transformation of services, including business environment	Target	Descriptions of ICT solutions development activities developed and harmonised
32	2.1.2.1.i. Centralised platforms, systems and services	Target	Approval of development plans for the creation, transformation or deployment of centralised ICT functions and shared services
33	2.1.2.1.i. Centralised platforms, systems and services	Target	Approval of harmonised descriptions of the development activities of centralised ICT solutions
38	2.1.3.r. Development of the national economic data and digital services economy	Milestone	Legal framework for the functioning of the national platform for the circulation of data
57	2.3.1.r. Development of a sustainable and socially responsible support framework for adult learning	Milestone	Enhanced support for training of employees
60	2.3.1.r. Development of a sustainable and socially responsible support framework for adult learning	Milestone	Development of the Individual Learning Accounts (ILA) approach
74	2.3.2.2.i. Development of state and local government digital transformation skills and capabilities	Milestone	Public administration digital skills framework developed
79	2.3.2.3.i. Closing the digital divide for socially vulnerable pupils and educational institutions	Target	Number of ICT equipment units for the target group (learners)
84	3.1.1.r. Administrative territorial reform	Milestone	Entry into force of a new "Municipality Law"
94	3.1.1.3.i. Investments in business public infrastructure for the development of industrial parks and areas in regions	Milestone	Award of contracts for the development of industrial parks in the regions

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
101	3.1.1.4.i. Establishing a financing fund for the construction of low-rent dwellings	Target	Number of apartments within approved projects
108	3.1.1.6.i. Purchase of zero-emission vehicles for the performance of municipal functions and related services	Target	Number of electric school buses under contracts awarded for the purchase of electric buses for the performance of the municipal functions and related services
111	3.1.2.r. Access to social and employment services in support of minimum income reform	Milestone	Entry into force of legislative amendments to improve the minimum income support system
119	3.1.2.2.i. Development of a forecast tool	Milestone	Completion of technical specifications for social security forecasting tool information system
122	3.1.2.3.i. Resilience and continuity of the long-term social care service	Target	Conclusion of contracts on the implementation of projects
124	3.1.2.4.i. Synergistic development of social and vocational rehabilitation services for the promotion of the resilience of people with functional disabilities	Milestone	Description of the vocational rehabilitation service adopted
127	3.1.2.5.i. Participation in the labour market of unemployed, jobseekers and people at risk of unemployment	Milestone	A retraining and up-skilling offer, with a focus on digital skills, has been established to clients (unemployed, jobseekers, persons at risk of unemployment) of the State Employment Agency for the job-rich recovery of the economy by implementing active labour market policy measures
128	3.1.2.5.i. Participation in the labour market of unemployed, jobseekers and people at risk of unemployment	Milestone	Development of a digital tool for skills assessment
143	4.2.1.r. Provision of human resources and upskilling	Milestone	Human resources development strategy
144	4.2.1.r. Provision of human resources and upskilling	Milestone	Adoption of Human Resources Mapping in Healthcare
146	4.2.1.r. Provision of human resources and upskilling	Milestone	Adoption of a model for health workforce planning

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
147	4.2.1.1.i. Support for the implementation of the human resources development system.	Milestone	A coordinating mechanism for health workforce training established
152	4.3.1.1.i. Support for assessing and improving the quality and accessibility of non-hospital secondary healthcare	Milestone	Study on the quality, accessibility and availability of non-hospital secondary healthcare
155	5.1.1.1.i. Operationalisation of a fully-fledged innovation system governance model	Target	Contracting or appointing the human resources needed
161	5.2.1.r. Reform of Higher Education and Scientific Excellence and Governance	Target	Consolidation of higher education institutions
168	6.1.1.r. Strengthening analytics and developing data management in the field of tax administration and customs	Milestone	Entry into operation of a basket of data-based services for each segmentation group of taxpayers
169	6.1.1.r. Strengthening analytics and developing data management in the field of tax administration and customs	Milestone	Publication of handbook for compliance risk management
171	6.1.1.r. Strengthening analytics and developing data management in the field of tax administration and customs	Milestone	Implementation of the research results
174	6.1.1.3.i. Personnel training with analytical platform and consultancy	Target	Training of staff to work with the analytical platform
181	6.1.2.4.i. Creation of infrastructure for the performance of control services in Kundziņsala	Milestone	Joint design – construction contract signed
184	6.1.2.4.i. Creation of infrastructure for the performance of control services in Kundziņsala	Milestone	Procurement and conclusion of a contract for the supply and installation of X-ray cargo control equipment
200	6.3.1.1.i. Open, transparent, fair and accountable public administration	Milestone	Competence framework available
202	6.3.1.2.i. Professionalisation of public administration and administrative and capacity building	Milestone	Competence framework available, including training programmes
219	7.2.i. Security and stability of energy supply, and synchronisation with the Union grid	Milestone	Regulations governing the installation of a Battery Energy Storage System
223	7.3.i. Upgrading, digitalising and securing the electricity transmission and distribution networks	Milestone	Regulations governing investments in the national

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			electricity transmission and distribution networks
229	7.4.i. Increasing the uptake of sustainable biomethane	Milestone	Regulations governing investments in the biomethane sector
		Instalment Amount	EUR 339 038 937

1.4. Fourth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
8	1.2.1.1.i. Improving the energy efficiency of multi-apartment buildings and transition to renewable energy technologies	Target	Approved projects representing at least EUR 40 097 400
12	1.2.1.2.i. Increasing energy efficiency in business in the form of a combined financial instrument	Target	Approved projects representing at least EUR 108 000 000
14	1.2.1.3.i. Improving municipal buildings and infrastructure by promoting the transition to renewable energy technologies and improving energy efficiency	Target	Award of contracts for the implementation of energy efficiency improvement projects for local government buildings and infrastructure for at least EUR 27 838 800
17	1.2.1.4.i. Improving the energy efficiency of public sector buildings, including historical buildings	Target	Notification of contract award for representing at least EUR 16 769 200
21	1.2.1.5.i. Modernisation of electricity transmission and distribution networks	Milestone	Entry into force of regulatory framework to ensure the transmission of electricity produced from RES to networks (including the use of forests and other public land for wind energy production) and to promote the development of wind energy infrastructure.
24	1.3.1.r. Disaster management system adaptation to climate change, rescue and rapid response services	Target	Total fire area for wild fires over the 5-year period (2020-2024)
25	1.3.1.2.i. Investments in flood risk reduction infrastructure	Milestone	Construction contracts awarded for half the total number of rebuilding and renewal
35	2.1.2.2.i. National Federated Cloud of Latvia	Target	Number of platforms or systems operated by shared

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			service providers through shared cloud services
43	2.2.1.1.i. Support for the establishment of Digital Innovation Hubs and Regional Contact Points	Target	Number of digital transformation roadmaps issued to entities by the European Digital Innovation Hubs (EDIH)
45	2.2.1.2.i. Support for the digitisation of processes in commercial activities	Target	Number of entities supported to digitise processes in commercial activity and for which the result of the digital maturity test improved, against the previous test result, after receipt of the grant and realisation of the project
47	2.2.1.3.i. Support for the introduction of new products and services into business	Target	Number of projects supported
50	2.2.1.4.i. Financial instruments to facilitate the digital transformation of economic operators	Target	Number of loan contracts signed
58	2.3.1.r. Development of a sustainable and socially responsible support framework for adult learning	Milestone	Developing the concept of skills funds
63	2.3.1.2.i. Development of digital skills of enterprises	Target	Number of trainings on basic digital skills provided to enterprises
66	2.3.1.4.i. Development of the approach to individual learning accounts	Target	Adults supported to acquire digital skills through individual learning account resources
71	2.3.2.1.i. Digital skills for people, including youth	Target	Number of people having participated in a training
75	2.3.2.2.i. Development of state and local government digital transformation skills and capabilities	Target	Number of trainings in digital skills competence areas completed by public administration employees
86	3.1.1.1.i. Improvement of the network of regional and local roads	Target	Renovated or rebuilt, regional and local roads for the safe accessibility of the county administrative centres and their services and jobs and for the full functioning of the new municipalities
90	3.1.1.2.i. Strengthening the capacity of municipalities to improve the	Milestone	Completion of the assessment of local government public services, identifying

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	efficiency and quality of their operations		shortcomings and measures to improve them
91	3.1.1.2.i. Strengthening the capacity of municipalities to improve the efficiency and quality of their operations	Target	Number of local government employees trained
113	3.1.2.1.i. Measures to promote access to public services and employment for people with disabilities and people with functional impairments	Milestone	Signature of contracts for ensuring access to public facilities in the buildings of public and local authorities
115	3.1.2.1.i. Measures to promote access to public services and employment for people with disabilities and people with functional impairments	Milestone	Selection of specific target group for improving physical access to housing
133	4.1.1.r. Sustainability and resilience of a human-centred, comprehensive, integrated healthcare system	Milestone	The genome reference of the Latvian population has been established (Latvia's participation in the Genome for Europe project – GoLatvia project)
139	4.1.1.2.i. Support for strengthening the health infrastructure of university and regional hospitals	Target	Achievement of budget execution as measured by overall procurement in projects improving the infrastructure of university and regional hospitals amounting to at least EUR 59 800 000 of total budget EUR 149 500 000
141	4.1.1.3.i. Support for strengthening health infrastructure of secondary outpatient service providers	Target	Number of secondary outpatient providers with improved infrastructure
145	4.2.1.r. Provision of human resources and upskilling	Milestone	New remuneration model for healthcare staff implemented
153	4.3.1.1.i. Support for assessing and improving the quality and accessibility of non-hospital secondary healthcare	Milestone	Mainstreaming results of quality, availability and accessibility of non-hospital secondary care study into health policy developments
157	5.1.1.2.i. Support instrument for research and internationalization	Milestone	Cabinet Regulations adopted
160	5.2.1.r. Reform of Higher Education and Scientific Excellence and Governance	Milestone	Higher education reform
172	6.1.1.1.i. Modernisation of existing analytical solutions	Milestone	Entry into operation of upgraded analytical solutions

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
173	6.1.1.2.i. Development of new analytical systems	Milestone	Entry into operation of new analytical systems
182	6.1.2.4.i. Creation of infrastructure for the performance of control services in Kundziņsala	Milestone	Building permit received
193	6.2.1.3.i. Establishment of a single training centre for the development of the qualifications of judges, court staff, prosecutors, assistant prosecutors and specialised investigators (interdisciplinary matters)	Target	New training programme development and approval
195	6.2.1.3.i. Establishment of a single training centre for the development of the qualifications of judges, court staff, prosecutors, assistant prosecutors and specialised investigators (interdisciplinary matters)	Milestone	Establishment of a training centre
207	6.3.1.4.i. Growth of non-governmental organisations to strengthen social security representation and monitor public interests	Target	Beneficiaries of the support programme
214	6.4.4.r. IUB IT and analytical capacity building	Milestone	Upgrade of publications management system completed
215	7.1.r. Transforming the national energy sector	Milestone	Regulations establishing a framework for registering and operating energy communities
216	7.1.r. Transforming the national energy sector	Milestone	Legislation amending norms on electricity trade and consumption
		Instalment Amount	EUR 349 129 913

1.5. Fifth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
2	1.1.1.r. Greening the Riga Metropolitan Range Transport System	Milestone	Reform of public transport RMA
4	1.1.1.i. Improving Riga Metropolitan transport infrastructure	Milestone	Signature of contracts for upgrading Riga Central Railway Station
15	1.2.1.3.i. Improving municipal buildings and infrastructure by promoting the transition to renewable	Target	Reduction in primary energy consumption in municipal buildings and infrastructure

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	energy technologies and improving energy efficiency		
53	2.2.1.5.i. Fostering the digital transformation of media companies	Target	Number of platforms and digital solutions created
56	2.3.1.r. Development of a sustainable and socially responsible support framework for adult learning	Target	Share of adults (25-64) involved in adult learning in the last four weeks prior to the survey (%)
57a	2.3.1.r. Development of a sustainable and socially responsible support framework for adult learning	Milestone	Adoption of the Action Plan “Human Capital Development Strategy”
95	3.1.1.3.i. Investments in business public infrastructure for the development of industrial parks and areas in regions	Target	Letters of intent/contracts concluded
96	3.1.1.3.i. Investments in business public infrastructure for the development of industrial parks and areas in regions	Target	Construction of industrial parks/territories where public infrastructure is developed in the regions
109	3.1.1.6.i. Purchase of zero-emission vehicles for the performance of municipal functions and related services	Target	Number of electric school buses purchased
109a	3.1.1.7.i. Loans to real estate developers for the construction of low-rent dwellings	Milestone	Implementing Agreement and completion of the investment
116	3.1.2.1.i. Measures to promote access to public services and employment for people with disabilities and people with functional impairments	Milestone	Signature of contracts to adapt the housing of persons with disabilities
129	3.1.2.5.i. Participation in the labour market of unemployed, jobseekers and people at risk of unemployment	Target	Unemployed, jobseekers, people at risk of unemployment with improved skills
136	4.1.1.1.i. Support for public health research	Milestone	Public health research carried out to improve public health policy planning and implementation in the field of AMR, vaccination and infectious diseases
158	5.1.1.2.i. Support instrument for research and internationalization	Target	Commitment of funding
176	6.1.2.1.i. Linking railway x-ray equipment to BAXE and use of artificial intelligence for rail freight scanning image analysis	Milestone	Railway customs control points’ scanners connected to x-ray images exchange system BAXE

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
180	6.1.2.3.i. Improvement of customs control of received postal items at Airport customs control point	Milestone	A line for intelligent scanned and automatic sorting/analysis of postal items introduced at the Airport customs control point
187	6.2.1.1.i. Establishment of AML Innovation Hub to improve the identification of money laundering	Milestone	Cooperation platform for financial intelligence and knowledge-sharing to improve the identification of money laundering
188	6.2.1.2i. Strengthening the capacity to investigate economic crime	Milestone	Progress report on implementation of the action plan is approved
189	6.2.1.2i. Strengthening the capacity to investigate economic crime	Target	Proportion of detected criminal proceedings of environmental crimes
190	6.2.1.2i. Strengthening the capacity to investigate economic crime	Target	Number of certified economic crime investigators in “Certified Anti Money Laundering Specialist (CAMS)” programme
191	6.2.1.2i. Strengthening the capacity to investigate economic crime	Target	Equipment for law enforcement officials
192	6.2.1.3.i. Establishment of a single training centre for the development of the qualifications of judges, court staff, prosecutors, assistant prosecutors and specialised investigators (interdisciplinary matters)	Milestone	Entry into force of the law and other legal acts related to the justice training centre
197	6.3.1.r. Modernisation of public administration	Milestone	Review of progress in the implementation of the Plan for Modernisation of Public Administration approved
201	6.3.1.1.i. Open, transparent, fair and accountable public administration	Target	Trainings completed by public administration employees
203	6.3.1.2.i. Professionalisation of public administration and administrative and capacity building	Target	Trainings completed by public administration employees
204	6.3.1.3.i. Development of the innovation ecosystem of public administration	Milestone	Entry into force of the regulatory framework in relation to the innovation ecosystem
205	6.3.1.3.i. Development of the innovation ecosystem of public administration	Milestone	Ensuring the financial sustainability of the Innovation Lab

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
217	7.1.r. Transforming the national energy sector	Milestone	Regulation on electricity network optimisation
218	7.1.r. Transforming the national energy sector	Milestone	Regulations on biomethane transported outside the natural gas transmission and distribution systems
220	7.2.i. Security and stability of energy supply, and synchronisation with the Union grid	Milestone	Contracts for the installation of a 60 MW Battery Energy Storage System and an IT solution for transmission network management
221	7.2.i. Security and stability of energy supply, and synchronisation with the Union grid	Target	Battery Energy Storage System (BESS)
222	7.2.i. Security and stability of energy supply, and synchronisation with the Union grid	Milestone	IT solution for power transmission network management
230	7.4.i. Increasing the uptake of sustainable biomethane	Milestone	Award of contracts for the construction of a regional biomethane injection point and for an IT solution for its smart management
231	7.4.i. Increasing the uptake of sustainable biomethane	Milestone	Regional biomethane injection point completed
		Instalment Amount	EUR 274 831 150

1.6. Sixth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
3	1.1.1.i. Improving Riga Metropolitan transport infrastructure	Target	Length of electric rail lines created and existing railway upgraded for passenger transport
4a	1.1.1.i. Improving Riga Metropolitan transport infrastructure	Milestone	Upgraded Riga Central Railway Station
5	1.1.1.i. Improving Riga Metropolitan transport infrastructure	Target	Zero-emission transport investments (electric buses and charging stations)
5a	1.1.1.i. Improving Riga Metropolitan transport infrastructure	Milestone	Public transport infrastructure projects completed
6	1.1.1.i. Improving Riga Metropolitan transport infrastructure	Target	Length of newly built or renovated cycle infrastructure in

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			the city of Riga and Pieriga (part of Riga Metropolitan Area)
9	1.2.1.1.i. Improving the energy efficiency of multi-apartment buildings and transition to renewable energy technologies	Target	Reduction of primary energy consumption in multi-apartment buildings with improved energy efficiency
11	1.2.1.2.i. Increasing energy efficiency in business in the form of a combined financial instrument	Target	Planned GHG emission savings
18	1.2.1.4.i. Improving the energy efficiency of public sector buildings, including historical buildings	Target	Reduction of primary energy consumption in public buildings with improved energy efficiency
20	1.2.1.5.i. Modernisation of electricity transmission and distribution networks	Target	Connection points for electric vehicles charging and/or microgeneration installation
23	1.3.1.1.i. Disaster management system adaptation to climate change, rescue and rapid response services	Target	Construction of nearly 0 - energy-consumption disaster management and emergency response centres
26	1.3.1.2.i. Investments in flood risk reduction infrastructure	Target	Number of investment projects completed
30	2.1.1.1.i. Administration modernisation and digital transformation of services, including business environment	Target	Delivery of ICT solutions for modernised public administration functions (including systems)
34	2.1.2.1.i. Centralised platforms, systems and shared services	Target	Number of centralised ICT platforms and systems set up and in operation
36	2.1.2.2.i. National Federated Cloud of Latvia	Target	Number of platforms or systems operated by shared service providers through shared cloud services
39	2.1.3.1.i. Data availability, sharing and analysis	Target	Sectors for which relevant datasets are available on the national data circulation platforms, including controlled distribution platforms, geoportal or open data portals
44	2.2.1.1.i. Support for the establishment of Digital Innovation Hubs and Regional Contact Points	Target	Number of digital transformation roadmaps issued to entities by the European Digital Innovation Hubs (EDIH)
44a	2.2.1.1.i. Support for the establishment of Digital Innovation Hubs and Regional Contact Points	Milestone	Support for the digital transformation of entities by the

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			European Digital Innovation Hubs (EDIH)
46	2.2.1.2.i. Support for the digitisation of processes in commercial activities	Target	Number of entities supported to digitise processes in commercial activity and for which the digital maturity test result improved, against the previous test result, after receipt of the grant and realisation of the project
48	2.2.1.3.i. Support for the introduction of new products and services into business	Target	Number of projects supported
49	2.2.1.3.i. Support for the introduction of new products and services into business	Target	Private finance attracted
51	2.2.1.4.i. Financial instruments to facilitate the digital transformation of economic operators	Target	Number of loan contracts signed
52	2.2.1.4.i. Financial instruments to facilitate the digital transformation of economic operators	Target	Private finance committed
54	2.2.1.5.i. Fostering the digital transformation of media companies	Target	Number of projects supported
59	2.3.1.r. Development of a sustainable and socially responsible support framework for adult learning	Target	Piloting skills funds
61	2.3.1.r. Development of a sustainable and socially responsible support framework for adult learning	Target	Piloting the individual learning account approach
62	2.3.1.1.i. Delivering high-level digital skills	Target	Number of professionals (business, academic and public sector) and students with advanced digital skills in quantum technologies, HPC and language technologies
64	2.3.1.2.i. Development of digital skills of enterprises	Target	Number of trainings on basic digital skills provided to enterprises
65	2.3.1.3.i. Development of a self-managed learning approach for ICT specialists	Target	Number of ICT specialists trained in a non-formal learning approach
67	2.3.1.4.i. Development of the approach to individual learning accounts	Target	Adults supported to acquire digital skills through individual learning account resources
68	2.3.2.r. Digital skills for the digital transformation of society and government	Target	Upskilling digital skills 16-74: citizens with at least basic digital skills.

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
72	2.3.2.1.i. Digital skills for people, including youth	Target	Number of people having participated in training or in technological innovation activities in digital youth work
73	2.3.2.1.i. Digital skills for people, including youth	Target	Number of municipalities with digital skills development programmes for young people
76	2.3.2.2.i. Development of state and local government digital transformation skills and capabilities	Target	Number of trainings in digital skills framework areas completed by public administration employees
83	2.4.1.2.i. Broadband or very high capacity network “last mile” infrastructure development	Target	Number of households, businesses, schools, hospitals and other public buildings which have access to the very high capacity broadband network
92	3.1.1.2.i. Strengthening the capacity of municipalities to improve the efficiency and quality of their operations	Target	Number of local government employees trained
97	3.1.1.3.i. Investments in business public infrastructure for the development of industrial parks and areas in regions	Target	Creation of new jobs in the industrial parks with average salaries above the average salary in the respective economic sector
102	3.1.1.4.i. Establishing a financing fund for the construction of low-rent dwellings	Target	Number of apartments within approved projects
103	3.1.1.4.i. Establishing a financing fund for the construction of low-rent dwellings	Target	Number of apartments built
106	3.1.1.5.i. Development and equipping of educational institutions’ infrastructure	Target	Developing and equipping educational institutions’ infrastructure
109b	3.1.1.7.i. Loans to real estate developers for the construction of low-rent dwellings	Target	Legal agreements signed with final beneficiaries
114	3.1.2.1.i. Measures to promote access to public services and employment for people with disabilities and people with functional impairments	Target	Completion of construction to ensure access to public facilities in state and local government buildings providing
117	3.1.2.1.i. Measures to promote access to public services and employment for	Target	Accessibility of the housing environment for persons with disabilities ensured

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	people with disabilities and people with functional impairments		
120	3.1.2.2.i. Development of a forecast tool	Milestone	Development of a forecasting tool
123	3.1.2.3.i. Resilience and continuity of the long-term social care service	Target	Provision of new places for long-term care services close to family settings for 408 persons of retirement age
125	3.1.2.4.i. Synergistic development of social and vocational rehabilitation services for the promotion of the resilience of people with functional disabilities	Milestone	Adaptation of building infrastructure, including promotion of environmental accessibility and energy efficiency, and improvement of the technical and material equipment
126	3.1.2.4.i. Synergistic development of social and vocational rehabilitation services for the promotion of the resilience of people with functional disabilities	Milestone	Adoption of a new standard for social and vocational rehabilitation services for the promotion of the resilience of people with functional impairments have been established and approved
130	3.1.2.5.i. Participation in the labour market of unemployed, jobseekers and people at risk of unemployment	Target	Unemployed, jobseekers, people at risk of unemployment with improved skills

232	7.4.i. Increasing the uptake of sustainable biomethane	Milestone	IT solution for the management of the new regional sustainable biomethane injection point (BIP)
		Instalment Amount	EUR 387 244 522

SECTION 3: ADDITIONAL ARRANGEMENTS

1. Arrangements for monitoring and implementation of the recovery and resilience plan

The implementation of the plan shall be coordinated by the Ministry of Finance.

The Ministry of Finance shall perform the functions of the Managing Authority; these shall be separated from its other functions, including those of the Audit Authority.

The Ministry of Finance as the Managing authority is in charge of the development of the management and control system of the plan, coordinating the reporting process during the implementation of the plan (a half-yearly report on the compilation and progress of the plan) and other functions. The Central Financing and Contract agency (CFCA) has been designated as an intermediary body delegated with responsibilities for implementation, control and monitoring of the plan.

The Audit Authority, which is independent from the other departments of the Ministry of Finance in its planning, auditing, reporting and opinion, shall develop a plan audit strategy and prepare a summary of the audits carried out to accompany the request for payments. The sectoral ministries and the State Chancellery shall perform the responsibilities related to the implementation of the plan

The necessary administrative resources for the management and monitoring functions of the plan shall be provided within the existing resources of responsible institutions, making use of additional human resources needed. The involvement of the authorities in the implementation of the plan takes place within the defined framework of their core activities and functions. Financing of sectoral ministries for the implementation of the plan shall be allocated in accordance with the relevant national procedures for the financing from the state budget.

A separate budget programme for Recovery and Resilience plan-related financial flows is provided in the state budget, which ensures the traceability and separability of the financial flows.

2. Arrangements for providing full access by the Commission to the underlying data

The Ministry of Finance, as the central coordinating body for Latvia's recovery and resilience plan and its implementation, is responsible for overall coordination and monitoring of the plan. Data related to the implementation and monitoring of the plan shall be stored in the existing EU funds management and control system KPVIS. KPVIS shall be adapted to the requirements under Regulation (EU) 2021/241 for data collection, progress reports and payment requests, including to collect indicators and other information necessary to demonstrate and report the achievement of milestones and targets. KPVIS shall be used by all actors involved in the implementation of the plan, including beneficiaries and monitoring authorities between the CFCA, line ministries and Audit Authority and others. Sectoral ministries shall continuously manage and update information in the KPVIS on the progress and results of the plan, on the checks carried out, controls, including deficiencies identified and all corrective actions taken.

In accordance with Article 24(2) of Regulation (EU) 2021/241, upon completion of the relevant agreed milestones and targets in Section 2.1 of this Annex, Latvia shall submit to the Commission a duly justified request for payment of the financial contribution. Latvia shall ensure that, upon request, the Commission has full access to the underlying relevant data that supports the due justification of the request for payment, both for the assessment of the request for payment in accordance with Article 24(3) of Regulation (EU) 2021/241 and for audit and control purposes.
