

## **Investment of aid schemes administered by Society Integration Foundation into the improvement of life quality of persons under the risk of social exclusion**

### **SIA "Projektu un kvalitātes vadība"**

**19.04.2008.- 20.08.2008.**

Objective of the research called „Investment of aid schemes administered by Society Integration Foundation into the improvement of life quality of persons under the risk of social exclusion” is to evaluate the implementation results of four aid schemes thus detecting their impact on reaching the common goals of Single Programming Document for Latvia Objective 1 Programme 2004-2006 and Programme Supplement. In order to reach the objective, there will be done the analysis of such aid schemes:

- Motivation programmes for the persons under the risk of social exclusion;
- Promotion of research on socially excluded groups in the labour market;
- Consultations and training for the development of entrepreneurship and self-employment;
- Development and implementation of social rehabilitation programmes.

At the beginning there will be provided the characterisation of projects implemented, then the analysis of the implementation results of aid schemes, reflecting the investments in reaching the common vertical and horizontal goals of Single Programming Document for Latvia Objective 1 Programme 2004-2006 and Programme Supplement, in reaching the goals of aid schemes, in solving the problems identified in the description of aid schemes as well. In addition there will be analysed also the use of results, sustainability and impact.

It is planned to analyse the opinion of the project promoters and develop the recommendations at the end.

There will be such methods used in the research:

- Pool of project promoters;
- Interviews of representatives from the institutions involved in the administration of EU structural funds;
- Analysis of gained statistical information;
- Analysis of documents;
- “LogFrame”
